Bendix Antilock Braking Systems and Traction Control

ABS systems are designated by the format "XS-YM" where X is the number of sensors in the system and Y is the number of modulators. There are always an even number of sensors, but depending on the installation, individual modulators may control more than one wheel. Example: A 6S-4M system has 6 sensors and 4 modulator valves.

SD-13-4869 Bendix EC-60 ABS / ATC / ESP Controllers ...

an in-cab trailer ABS Indicator Lamp installed. Trailers built since March 1, 2001 transmit the status of the trailer ABS over the power line (the blue wire of the J560 connector) to the tractor using a Power Line Carrier (PLC) signal. See Figures 6 and 7. Typically the signal is broadcast by the trailer ABS ECU.
