Introduction to Light and Color - NASA

Introduction to Light Light is a form of radiant energy or energy that travels in waves Since Greek times, scientists have debated the nature of light Physicists now recognize that light sometimes behaves like waves and, at other times, like particles When moving from place to place, light acts like a system of waves In empty space, light ...

What is Light? - SPIE

Light is part of the electromagnetic radiation spectrum and is a form of energy Light is usually considered to be the visible part of the spectrum However, in physics, light can be defined as all ...

12 Light scattering methods - NIST

The light is incident from the upper left with direction vector \mathbf{K}_i , and it illuminates an area of an undulating (rough) surface To simplify the geometrical arguments here, it is assumed that the surface is smooth along the y-direction and that the light is incident in the x-z plane as shown The reflected light
