### Abduction!

In 1904, New York nuns brought forty Irish orphans to a remote Arizona mining camp, to be placed with Catholic families. The Catholic families were Mexican, as was the majority of the population. Soon the town's Anglos, furious at this interracial transgression, formed a vigilante squad that kidnapped the children. This title tells this tale.

When Luke and Mandy start experiencing strange hallucinations and blackouts, they know something is seriously, out-of-this-world wrong. Luke Ingram is on his way home one evening when the sky goes black and seems to swallow him whole—but four hours later he wakes up in his own room with no idea how he got there. And Luke isn't the only one experiencing these strange occurrences. The last thing Mandy Durgin remembers before waking up on her front porch is falling asleep in her bed hours before. When their creepy classmate Quentin starts

following them around and harassing them, Luke and Mandy realize Quentin may know more about their lost time than he's letting on. They know something isn't right, but what could possibly have caused them to black out at the same time? And why are they having the same terrifying hallucinations about cold operating tables and large, bug-like eyes? Mandy knows there has to be a rational explanation, but Luke isn't so sure. Those faces in his visions were so . . . alien. Still, the thought of alien abductions is absurd. But when Luke and Mandy black out again the next night, Luke is ready to consider the possibility that their troubles might have an extraterrestrial cause.

This book contains a collection of easy to read biblical skits and devotionals with an emphasis on evangelism. These writings are designed to be used for various aspects of church ministry. Though initially written with youth groups in mind, these skits and devotionals are not limited in their appeal to all ages. Each skit is based on scriptures from the Holy Bible and injects dialogue from everyday life. The shortness of each skit makes them adaptable for use in enhancing a regular worship service as an added feature or as the main feature of the program. All writings are designed to positively impact people and to create versatility in the method of spreading the gospel to all generations. The format of each work is simple, yet effective in providing interesting, informative, and spiritual messages. The length of each performance can be varied through the inclusion or elimination of songs. Successful performances can be rendered without hours of rehearsal and preparation. Speaking parts can be read or memorized without depreciating the effectiveness of the underlying message. Program committee leaders for women's auxiliaries, brotherhoods, usher boards, choirs, and

youth groups can use these writings in their monthly or annual programs. Since each skit has only a few characters, each work is adaptable for groups of any size. Flexibility in altering the method of presentation without changing the message affords the users an opportunity to customize a skit to meet their specific needs. Each skit has been successfully presented by several church organizations of which I am affiliated. This book, *Write*, is designed to glorify God, magnify Jesus Christ, and spread the gospel throughout the world.

Clancy argues that abductees are sane and intelligent people who have unwittingly created vivid false memories from a mlange of nightmares, culturally available texts, and a powerful drive for meaning that science is unable to satisfy. This book is not only a subtle exploration of the workings of memory, but a sensitive inquiry into the nature of belief.

From the very beginning of their investigation of human reasoning, philosophers have identified two other forms of reasoning, besides deduction, which we now call abduction and induction. Deduction is now fairly well understood, but abduction and induction have eluded a similar level of understanding. The papers collected here address the relationship between abduction and induction and their possible integration. The approach is sometimes philosophical, sometimes that of pure logic, and some papers adopt the more task-oriented approach of AI. The book will command the attention of philosophers, logicians, AI researchers and computer scientists in general.

### Geraldine Maynard; or, The abduction

Recent stories of long-term abduction have flooded our current news. Everyone wants to know why children stay with their captor even when opportunity presents itself. The media scrambles to get expert and eye witness interviews. We place the child in front of a camera to get that smile of relief. We fail to look deeper and ask the real important questions. The young boy stands there confused and afraid. They have just been ripped from all they know, captivity. That is all about to change. In reading the life story of a former abducted child and revisiting one of the first national cases of child stealing in America, *Throwing Stones; Parental Child Abduction Through the Eyes of a Child* gives a dark narrative look into the life of a seven year old boy ripped from all he knows, and later returned to a life of hell at the age of eleven. His baby was brother raised to hate a woman he was too young to know. His older sister consumed with her own inner turmoil turns violently on him. Left alone to find his own way he befriends anyone who will give him a sense of self worth. A peaceful and quiet child at the

Infected with an internal struggle to hold on to dying memories of a loving mother ripped from him, he gives in. After many lies, little Kenny starts to protect the man he fears most, his Father. Regardless of his outward environment, he finds hope and strength from within. Clear and sobering, this is long overdue. No other book has been written from the child's perspective concerning Child Theft. This case takes place before there was the National Center for the Missing and Exploited Children (NCMEC). His abduction was the first to involve a multi-state-manhunt and the Federal Bureau of Investigation.
