Amazing Rare Things

Introduce your baby to the fascinating adventures of famous naturalist John Muir. John Muir was a Scottish-born American naturalist, author who became known as "Father of the National Parks." Millions have read his letters, essays, and books of his adventures in nature, and his advocacy was essential in helping to preserve many beautiful parts of the West--especially Yosemite National Park. Kate Coombs' enchanting poem and Seth Lucas' adorable illustrations share Muir's love of the Sierras, the Sequoias and Redwoods, and the birds and animals of the West with the next generation of little nature-lovers, fostering a life-long appreciation of the world around them. Kate Coombs has written several books for children, including the award winning poetry collection Water Sings Blue and most recently Goodnight Mr. Darcy. A former teacher of every grade from kindergarten through college, Kate makes her home in Utah. Seth Lucas is an illustrator and designer with a BFA in graphic design. He is the co-creator of Ello There Outdoors selling prints and accessories supporting the National Parks and outdoors. He lives in Indianapolis, Indiana, with his wife and daughter.

Kids' Outdoor Adventure Book

A classic since its first publication in 1947, Adventures with a Texas Naturalist distills a lifetime of patient observations of the natural world. This reprint contains a new introduction by noted nature writer Rick Bass.

Journeys to the Other Side of the World

Sir David Attenborough's career as a naturalist and broadcaster has spanned nearly five decades and there are very few places on the globe that he has not visited. In this volume of memoirs David tells stories of the people and animals he has met and the places that he has visited. Sir David's first job after Cambridge University and two years in the Royal Navy - was at the London publishing house Hodder & Stoughton. Then in 1952 he joined the BBC as a trainee producer and it was while

Download Ebook Adventures Of A Young Naturalist The Zoo Quest Expeditions

working on the Zoo Quest series (1954-64) that he had his first opportunity to undertake expeditions to remote parts of the globe to capture intimate footage of rare wildlife in its natural habitat. He was Controller of BBC2 (1965-68), during which time he introduced colour television to Britain, then Director of Programmes for the BBC (1969-1972). However in 1973 he abandoned administration altogether to return to documentary-making and writing. Over the last 25 years he has established himself as the world's leading natural history programme maker with several landmark BBC series, including Life on Earth (1979), The Living Planet (1984), The Trials of Life (1990), The Private Life of Plants (1995) and Life of Birds (1998). Sir David Attenborough is a Trustee of the British Museum and the Royal Botanic Gardens, Kew: an Honorary Fellow of Clare College, Cambridge: a Fellow of the Royal Society and was knighted in 1985.

The Naturalist on the River Amazons

Become a more attentive observer and deepen your appreciation for the natural world. The unique five-year calendar format of The Naturalist 's Notebook helps you create a long-term record and point of comparison for memorable events, such as the first songbird you hear in spring, your first monarch butterfly sighting of summer, or the appearance of the northern lights. Biologist Nathaniel T. Wheelwright and best-selling author Bernd Heinrich teach nature lovers of all ages what to look for outdoors no matter where you live, using Heinrich 's classic illustrations as inspiration. As you jot down one observation a day, year after year, your collected field notes will serve as a valuable record of your piece of the planet. This deluxe book, with a three-piece case, gilt edges, a burgundy ribbon bookmark, and a belly band with gold foil stamping, is a perfect gift for all nature lovers.

Adventures with a Texas Naturalist

A vibrant graphic adaptation of the classic science memoir Regarded as one of the world's preeminent biologists, Edward O. Wilson spent his boyhood exploring the forests and swamps of south Alabama and the Florida panhandle, collecting snakes, butterflies, and ants—the latter to become his lifelong specialty. His memoir Naturalist, called "one of the finest scientific memoirs ever written " by the Los Angeles Times, is an inspiring account of Wilson's growth as a scientist and the evolution of the fields he helped define. This graphic edition, adapted by New York Times bestselling comics writer Jim Ottaviani and illustrated by C.M. Butzer, brings Wilson's childhood and celebrated career to life through dynamic full-color illustrations and Wilson's own lyric writing. In this adaptation of Naturalist, vivid illustrations draw readers in to Wilson's lifelong quest to explore and protect the natural world. His success began not with an elite education but an insatiable curiosity about Earth's wild creatures, and this new edition of Naturalist makes Wilson's work accessible for anyone who shares his passion. On every page, striking art adds immediacy and highlights the warmth and sense of humor that sets Wilson's writing apart. Naturalist was written as an invitation—a reminder that curiosity is vital and scientific exploration is open to all of us. Each dynamic frame of this graphic adaptation deepens Wilson's message, renewing his call to discover and celebrate the little things of the world.

The Naturalist's Notebook

ROSAT, the ROentgen SATellite launched in 1990, has revealed an entirely new aspect of the night sky - that of objects emitting X-rays rather than the rays of light visible to the human eye. This lavishly illustrated book is the first to describe one of the most remarkable instruments in modern astronomy. It offers fascinating images and engaging accounts of a wide range of Solar-System and deep space objects such as Comet Hyakutake, the Sun, the Moon, and objects outside the Milky Way.

Naturalist

From the New York Times bestselling author of *The Invention of Nature*, comes a breathtakingly illustrated and brilliantly evocative recounting of Alexander Von Humboldt's five year expedition in South America. Alexander von Humboldt (1769-1859) was an intrepid explorer and the most famous scientist of his age. His restless life was packed with adventure and discovery, but his most revolutionary idea was a radical vision of nature as a complex and interconnected global force that does not exist for the use of humankind alone. His theories and ideas were profoundly influenced by a five-year exploration of South America. Now Andrea Wulf partners with artist Lillian Melcher to bring this daring expedition to life, complete with excerpts from Humboldt's own diaries, atlases, and publications. She gives us an intimate portrait of the man who predicted human-induced climate change, fashioned poetic narrative out of scientific observation, and influenced iconic figures such as Simón Bolívar, Thomas Jefferson, Charles Darwin, and John Muir. This gorgeous account of the expedition not only shows how Humboldt honed his groundbreaking understanding of the natural world but also illuminates the man and his passions.

Zoo Quest to Guyana

Plantology guides young nature enthusiasts on a journey into the world of plants and the role they play in our lives. Full of colorful photos and illustrations, this fun and interactive resource presents clear, kid-friendly discussions of plant topics from the underground up—from seeds, roots, and sprouts to plant skeletons, leaves, petals, flowers, and fruits. But naturalist Michael Elsohn Ross goes beyond plant basics to explore the unknown world of common weeds, fascinating plant defense systems, the marvelous mechanisms of seed dispersal and pollination, and the history of everyday plant products in our homes. Plantology also illuminates humans' connections with plants and the solutions they offer, from low-cost sewage treatment and toxic waste removal to providing new medical cures. With encouragement to "Try This" and "Look For," kids participate in 30 hands-on activities that promote observation and analysis, writing and drawing, math and science, and nature literacy skills. They will keep a plant journal, examine and sketch plant shapes, colors, and structures; start a seed collection, make tasty plant dishes, and more. Readers from any region will start to take notice of the plants around them—not just in parks, gardens, and woods but also around the schools, buildings, and sidewalks of their town, and in their own backyards. Useful resources include a glossary of plant terms, a list of plant and nature organizations and groups, and a teacher's guide to initiate classroom discussion and investigation.

The Supernaturalist

A portrait of the German naturalist reveals his ongoing influence on humanity's relationship with the natural world today, discussing such topics as his views on climate change, conservation, and nature as a resource for all life.

Journeys in the Wild

From Madagascar and New Guinea to the Pacific Islands and the Northern Territory of Australia, young David Attenborough and his cameraman were aiming to record not just the wildlife, but the way of life of some of the indigenous people of these regions, whose traditions had never been encountered by most of the public before. In the late 1950s onward, following the success of the original Zoo Quest expeditions, Attenborough embarked on further travels in a very different part of the world. From the land divers of Pentecost Island and the sing-sings of New Guinea, to a Royal Kava ceremony on Tonga and the ancient art of the Northern Territory, it is a journey like no other. Alongside these remarkable cultures he encounters paradise birds, chameleons, sifakas and many more animals in some of the most unique environments on the planet. Written with David Attenborough's characteristic charm, humor and warmth, Journeys to the Other Side of the World is an inimitable adventure among people, places and the wildest of wildlife. span

Diary of a Young Naturalist

The Zoo Quest Expeditions

Narrates the early life of this famous naturalist illustrator during his time in the fields and woods near his country house in France and his journey to America to seek his fortune. Simultaneous.

Guide to Linear Algebra

Describes the physical characteristics, behavior, voices, and habitats of a variety of common birds, arranged by their color. Includes the Peterson System of identifying birds by their unique markings.

The Invisible Sky

Adventures of a Young Naturalist

Edward O. Wilson -- University Professor at Harvard, winner of two Pulitzer prizes, eloquent champion of biodiversity -- is arguably one of the most important thinkers of the twentieth century. His career represents both a blueprint and a challenge to those who seek to explore the frontiers of scientific understanding. Yet, until now, little has been told of his life and of the important events that have shaped his thought. In *Naturalist*, Wilson describes for the first time both his growth as a scientist and the evolution of the science he has helped define. He traces the trajectory of his life --

Download Ebook Adventures Of A Young Naturalist The Zoo Quest Expeditions

from a childhood spent exploring the Gulf Coast of Alabama and Florida to life as a tenured professor at Harvard -- detailing how his youthful fascination with nature blossomed into a lifelong calling. He recounts with drama and wit the adventures of his days as a student at the University of Alabama and his four decades at Harvard University, where he has achieved renown as both teacher and researcher. As the narrative of Wilson's life unfolds, the reader is treated to an inside look at the origin and development of ideas that guide today's biological research. Theories that are now widely accepted in the scientific world were once untested hypotheses emerging from one man's broad-gauged studies. Throughout *Naturalist*, we see Wilson's mind and energies constantly striving to help establish many of the central principles of the field of evolutionary biology. The story of Wilson's life provides fascinating insights into the making of a scientist, and a valuable look at some of the most thought-provoking ideas of our time.

John Audubon, Young Naturalist

This textbook offers a carefully paced and sympathetic treatment of linear algebra, assuming knowledge only of the basic notation and elementary ideas of set theory. It progresses gradually to the more powerful and abstract notions of linear algebra, providing exercises which test and develop the reader's understanding at the end of each section. Full answers are given for most of the exercises to facilitate self-paced study.

Counting Birds

In the future, in a place called Satellite City, fourteen-year-old Cosmo Hill enters the world, unwanted by his parents. He's sent to the Clarissa Frayne Institute for Parentally Challenged Boys, Freight class. At Clarissa Frayne, the boys are put to work by the state, testing highly dangerous products. At the end of most days, they are covered with burns, bruises, and sores. Cosmo realizes that if he doesn't escape, he will die at this so-called orphanage. When the moment finally comes, Cosmo seizes his chance and breaks out with the help of the Supernaturalists, a motley crew of kids who all have the same special ability as Cosmo—they can see supernatural Parasites, creatures that feed on the life force of humans.

Life on Air

Here is an award-winning, new translation that brings to light Gregory's complex identity as an early mystic. Gregory (c. 332-395) was one of the Greek Cappadocian Fathers, along with St. Basil the Great and St. Gregory Nazianzen.

A Celebration of David Attenborough: The Activity Book

Boston Globe nature columnist discusses the lovelorn messages sent by singing insects on autumn evenings, the messages contained in spiderwebs, the effects of winter snow on the way sound travels, the way all life depends on the unusual structure of water, and much more. Most fun is the author's description of ways to interact with other creatures (e.g., teaching wild birds to eat out of your hand).

Adventures of a Young Naturalist

"Adventures of a Young Naturalist" by Lucien Biart. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten – or yet undiscovered gems – of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

The Colors of Nature

Adventures of a Young Naturalist

Life on Air

Nature is a destination, but you don't have to travel anywhere to find it. Just open the door and step outside. A fun, hands on approach to getting involved in nature, The Kids' Outdoor Adventure Book is a year-round how-to activity guidebook for getting kids outdoors and exploring nature, be it catching fireflies in the cool summer evenings; making birdfeeders in the fall from peanut butter, pine cones, and seed; building a snowman in 3 feet of fresh winter snow; or playing duck, duck, goose with friends in a meadow on a warm spring day. The Kids' Outdoor Adventure Book includes 448 things to do in nature for kids of all ages--more than one activity for every single day of the year. Each of the year's four seasons includes fifty checklist items, fifty challenge items, three each of projects, destinations, garden recipes, and outdoor games. Throughout the book, you'll also find fascinating facts, useful tips and tricks, and plenty of additional resources to turn to. Complete with whimsical, vibrant illustrations, this book is a must for parents and their kids.

Zoo Quest for a Dragon

David Attenborough is one of the most influential and admired figures in English television. When 26, he applied for a job in the BBC - which then meant radio - and was promptly turned down. But someone saw his rejected application and asked, would he like to try television? He would, and sixty years later, he is still at it. Elegantly told, often very funny, here is his story. At home there is his rise to controlling BBC2, introducing colour television to Britain, encounters with Montgomery, Anthony Eden, singers, athletes, explorers, the Queen, Benjamin Britten. Abroad there are people just as remarkable, journeys up tropical rivers, to the interior of New Guinea or the Australian outback, dragons, birds of paradise, flying snakes and walls of cockroaches. Now updated to cover his work since 2009, Life on Air is a remarkable account of David Attenborough's passion for the natural world and his lifelong quest to understand it. .

Can Russia Invade India?

The Naturalist

No U.S. president is more popularly associated with nature and wildlife than Theodore Roosevelt—prodigious hunter, tireless adventurer, and ardent conservationist. We think of him as a larger-than-life original, yet in *The Naturalist*, Darrin Lunde has located Roosevelt in the proud tradition of museum naturalism. From his earliest days, Roosevelt actively modeled himself on the men who pioneered a key branch of biology through the collection of animal specimens and by developing a taxonomy of the natural world. The influence they would have on Roosevelt shaped not only his audacious personality but also his career, informing his work as a statesman and ultimately affecting generations of Americans' relationships to this country's wilderness. Drawing on Roosevelt's diaries and expedition journals, and pulling from his own experience as a leading figure in today's museum naturalism, Lunde constructs a thoughtfully researched, singularly insightful history that tracks Roosevelt's maturation from exuberant boyhood hunter to vital champion of serious scientific inquiry.

Plantology

An astonishing, evocative exploration of the natural world and all its wonders, by 15-year-old conservationist and rising literary star Dara McAnulty

Working with Nature

Backyard Birds

'Gavin Thurston's book has all sorts of strengths. His camera has captured some of the most eye-catching images of the natural world ever seen on television. And he can write. He brings the process home to us in a style that is modest, down to earth and full of humour. This is one of the best books about filming I've ever read.'

MICHAEL PALIN 'Gavin's book is extraordinary: his easy prose and gasp-making encounters make for a gripping and very funny read. It's a rollercoaster ride with a complete professional. I loved it.'

JOANNA LUMLEY '[Gavin is] a great cameraman with infinite patience, but also a writer with great powers of observation and expression. Brilliant!'

ALAN TITCHMARSH *** From Gavin Thurston, the award-winning *Blue Planet II* and *Planet Earth II* cameraman with a foreword by Sir David Attenborough comes extraordinary and adventurous true stories of what it takes to track down and film our planet's most captivating creatures. Gavin has been a wildlife photographer for over thirty years. Against a backdrop of modern world history, he's lurked in the shadows of some of the world's remotest places in order to capture footage of the animal kingdom's finest: prides of lions, silverback gorillas, capuchin monkeys, brown bears, grey whales, penguins, mosquitoes - you name it he's filmed it. From journeys to the deepest depths of the Antarctic Ocean and the wide expanse of the Saharan deserts, to the peaks of the Himalayas and the wild forests of the Congo, Gavin's experiences describe much more than just the incredible array of animals he's filmed. He invites you to come inside the cameraman's hidden world and discover the hours spent patiently waiting for the protagonists to appear; the inevitable dangers in the wings and the challenges faced and overcome; and the heart-

Download Ebook Adventures Of A Young Naturalist The Zoo Quest Expeditions

warming, life-affirming moments the cameras miss as well as capture.

The Adventures of John Muir

Set at a time when Darwin was reshaping the world and a new breed of explorer-hero possessed the popular imagination, this novel is a spellbinding tale of loss, discovery, and love that unwinds along a breathtakingly beautiful expedition up the Amazon. It is 1867, Philadelphia. More at ease among his books than in the field, Paul Ash takes a reluctant leave of absence from Harvard's Museum of Comparative Zoology to accompany his grieving stepmother and her young companion to the fabled River Sea. Paul holds no memory of the place, though he was born there. As it transpires, however, neither the region nor its people have forgotten Paul. The Amazon lays claim to him in no uncertain terms, but it also works a peculiar magic on both his father's lovely widow and her friend - a quiet little Quaker named Rachel Weaver who proves strangely at home in the wild.

The American Jungle

Everyday kids learn how they can help protect bird species, near and far, with Counting Birds—the real-life story of bird counting and watching. What can you do to help endangered animals and make a positive change in our environment? Get counting! Counting Birds is a beautifully illustrated book that introduces kids to the idea of bird counts and bird watches. Along the way, they will learn about Frank Chapman, who used his bird knowledge and magazine Bird-Lore to found the first annual bird count. Bird counting helps professional researchers collect data, share expertise, and spread valuable information to help all kinds of birds around the world, from condors to hawks to kestrels and more. Counting Birds introduces kids to a whole feathered world that will fascinate and inspire them to get involved in conservation and become citizen scientists.

The Invention of Nature

Just for kids: A guided nature journal to see, write, and sketch every discovery. Wild creatures, cloud formations, plant habitats, and more--nature is full of wonders to behold and explore! In this nature journal, young naturalists will get all of the guidance they need to study and record their experiences of the natural world. From developing observational skills to sketching and using all senses, Exploring Nature Journal for Kids encourages curious minds to think creatively and scientifically about the world around them. Complete with activity prompts and journaling ideas, this book is a must-have to make every outdoor adventure an opportunity for discovery. The Exploring Nature Journal for Kids includes: Nature Journal 101--Teach kids how to hone their powers of observation with essential guidance for taking field notes, using descriptive language, drawing, and reflecting on what they've seen! Handy Guidance--Get inspiration for outings, journaling ideas to spark writing, along with clues for what to look for and where. Space to Explore--Jot down thoughts, sketch, and engage your little naturalist's creativity. There is a world of discovery waiting outside--and this nature journal is the kids guide to experiencing it.

The Adventures of Alexander Von Humboldt

Download Ebook Adventures Of A Young Naturalist The Zoo Quest Expeditions

From African American to Asian American, indigenous to immigrant, "multiracial" to "mixedblood," the diversity of cultures in this world is matched only by the diversity of stories explaining our cultural origins: stories of creation and destruction, displacement and heartbreak, hope and mystery. With writing from Jamaica Kincaid on the fallacies of national myths, Yusef Komunyakaa connecting the toxic legacy of his hometown, Bogalusa, LA, to a blind faith in capitalism, and bell hooks relating the quashing of multiculturalism to the destruction of nature that is considered "unpredictable" — amongst more than 35 other examinations of the relationship between culture and nature — this collection points toward the trouble of ignoring our cultural heritage, but also reveals how opening our eyes and our minds might provide a more livable future. Contributors: Elmaz Abinader, Faith Adiele, Francisco X. Alarcón, Fred Arroyo, Kimberly Blaeser, Joseph Bruchac, Robert D. Bullard, Debra Kang Dean, Camille Dungy, Nikky Finney, Ray Gonzalez, Kimiko Hahn, bell hooks, Jeanne Wakatsuki Houston, Pualani Kanaka 'ole Kanahale, Robin Wall Kimmerer, Jamaica Kincaid, Yusef Komunyakaa, J. Drew Lanham, David Mas Masumoto, Maria Melendez, Thyllias Moss, Gary Paul Nabhan, Nalini Nadkarni, Melissa Nelson, Jennifer Oladipo, Louis Owens, Enrique Salmon, Aileen Suzara, A. J. Verdelle, Gerald Vizenor, Patricia Jabbeh Wesley, Al Young, Ofelia Zepeda

The Curious Naturalist

Adventures of a Young Naturalist

From cocoa farming in Ghana to the orchards of Kent and the desert badlands of Pakistan, taking a practical approach to sustaining the landscape can mean the difference between prosperity and ruin. Working with Nature is the story of a lifetime of work, often in extreme environments, to harvest nature and protect it - in effect, gardening on a global scale. It is also a memoir of encounters with larger-than-life characters such as William Bunting, the gun-toting saviour of Yorkshire's peatlands and the aristocratic gardener Vita Sackville-West, examining their idiosyncratic approaches to conservation. Jeremy Purseglove explains clearly and convincingly why it's not a good idea to extract as many resources as possible, whether it's the demand for palm oil currently denuding the forests of Borneo, cottonfield irrigation draining the Aral Sea, or monocrops spreading across Britain. The pioneer of engineering projects to preserve nature and landscape, first in Britain and then around the world, he offers fresh insights and solutions at each step.

Gregory of Nyssa (CWS)

The author's account of journeys to Guyana, Indonesia and Paraguay in search of rare and bizarre creatures for the benefit of TV viewers.

Life on Earth

Describes the methods by which selected European artists, from Leonardo Da Vinci to Mark Catesby, portrayed the natural world during the Age of Discovery.

Naturalist

Download Ebook Adventures Of A Young Naturalist The Zoo Quest Expeditions

THE SUNDAY TIMES BESTSELLER - The gripping adventures of a young David Attenborough, published in a beautiful gift hardback, with a new introduction and a new selection of 90 pictures, including colour 'A marvellous book unputdownable utterly engaging' Telegraph 'An elegant and gently funny writer' The Times 'His writing is as impressive and as enjoyable as his TV programmes and there can be no higher praise' Daily Express In 1954, a young David Attenborough was offered the opportunity of a lifetime - to travel the world finding rare and elusive animals for London Zoo's collection, and to film the expeditions for the BBC for a new show called Zoo Quest. This book records those voyages, which mark the very beginning of a career that spans decades and stretches across continents, from Life on Earth to Blue Planet II, from the deepest oceans, the darkest jungles and everywhere in between'. Staying with local tribes while trekking in search of giant anteaters in Guyana, Komodo dragons in Indonesia and armadillos in Paraguay, he and the rest of the team battled with cannibal fish, aggressive tree porcupines and escape-artist wild pigs, as well as treacherous terrain and unpredictable weather, to record the incredible beauty and biodiversity of these regions. The methods may be outdated now, but the fascination and respect for the wildlife, the people and the environment - and the importance of protecting these wild places - is not. Written with Attenborough's trademark wit and charm, Adventures of a Young Naturalist is not just the story of a remarkable adventure, but of the man who made us fall in love with the natural world, and who is still doing so today. Praise for Sir David Attenborough 'A great educator as well as a great naturalist' - Barack Obama 'Sir David is a wizard of television, and, like Gandalf or Dumbledore, he has a near-magical gift for combining warmth and gravitas . . . the man who, for me, exemplifies the best in British broadcasting' - Louis Theroux 'When I was a young boy I used to love turning on the television and watching David's programmes and really feeling like I was either back out in Africa or I was learning about something magical and almost out of this planet' - Prince William

Exploring Nature Journal for Kids

A highly diverting celebration of television's favourite naturalist, packed with games, trivia and Attenborough-inspired activities. Attenborough. Just saying the name makes everyone feel better. Words like 'dependable', 'inspiring' and 'soothing' cascade like the rains returning to the sun-parched savanna. And according to a recent poll, he's the most trustworthy person alive, above Michelle Obama and The Queen. When the public was tasked with coming up with a name for the British Antarctic Survey's new research vessel, there was only one real choice. We could all picture the Queen christening the Royal Research Ship Sir David Attenborough. And then someone came up with Boaty McBoatface. Game over. Yet amid the cries of 'Democracy has failed!' the name chosen was RRS Sir David Attenborough. To the delight of the nation, though, Sir David, with a twinkle in his eye, confirmed that 'Boaty' would endure as the name of a remotely operated yellow submarine on board. So what have we learned from this? British people love silliness. And this book is a celebration of our two favourite things: Attenborough and silliness. You'll find games like Guess the animal from David's description, the David Attenborough drinking game, Create your own Attenborough coat of arms, Spot the fake species, Attenbingo, come up with a new animal print design for David's patented blue shirt in Patternborough, and if you find yourself in times of trouble, seek solace with the

Download Ebook Adventures Of A Young Naturalist The Zoo Quest Expeditions

What would Attenborough do? self-help guide. Everything you've ever wanted to know about the great man – from fun facts and remarkable quotes, plus ludicrous games – lies within the sustainably forested habitat of these pages. It's the perfect present for, well, anyone, really.

The Naturalist

"A GREAT BOOK." --THE NEW YORK TIMES "MARVELOUS." --THE TELEGRAPH
"A RARE GLIMPSE OF A FLEDGLING DAVID ATTENBOROUGH IN THE WILD."
--VANITY FAIR Living legend and presenter of BBC's Planet Earth series Sir David Attenborough tells the story of his early career as a broadcaster and a naturalist in his own words. In 1954, David Attenborough, a young television presenter, was offered the opportunity of a lifetime--to travel the world finding rare and elusive animals for the London Zoo's collection, and to film the expedition for the BBC for a new show called Zoo Quest. This is the story of those voyages. Staying with local tribes while trekking in search of giant anteaters in Guyana, Komodo dragons in Indonesia, and armadillos in Paraguay, he and the rest of the team contended with cannibal fish, aggressive tree porcupines, and escape-artist wild pigs, as well as treacherous terrain and unpredictable weather, to record the incredible beauty and biodiversity of these regions. Written with his trademark wit and charm, Adventures of a Young Naturalist is not just the story of a remarkable adventure, but of the man who made us fall in love with the natural world and taught us the importance of protecting it--and who is still doing so today.
