Wild Rescuers: Sentinels in the Deep Ocean

How can teachers make sure that all students gain the reading skills they need to be successful in school and in life? In this book, Karen Tankersley describes the six foundational "threads" that students need to study in order to become effective readers: phonemic awareness, phonics and decoding, vocabulary, fluency, comprehension, and higher-order processing. For each area, the author explains how students acquire the reading skills they need and offers a series of skill-building strategies and activities that teachers can use in the classroom. Although reading is perhaps most intensely taught in the kindergarten and 1st-grade classrooms, Tankersley emphasizes that helping students become lifelong readers is a task for all teachers, including content-area teachers in middle and high schools. The Threads of Reading addresses key questions about literacy, such as * What makes a difference in reading achievement? * How much reading time is enough? * How can teachers use writing to build reading skills? * How can teachers help students make meaning from their reading? The strategies in this book address many situations, from individual instruction to small- or large-group instruction, from kindergarten to high school. Teachers will appreciate the multitude of activities provided, and administrators will learn to better evaluate the reading programs in place in their districts and schools. Grounded in both research and "teacher lore" from actual classrooms, this book is a solid guide to helping students become lifelong readers. Note: This product listing is for the Adobe Acrobat (PDF) version of the book.

Move over, coloring books! Here's an entirely new craft that kids will love: Paint by Sticker Kids. Paint by Sticker Kids is the same compelling craft first introduced in Paint by Sticker, but just for kids! The book includes everything you need to create 10 bright, playful, full-color illustrations—illustrated templates printed on perforated card stock, and 10 pages of stickers to fill in and create the artwork. The fun, vibrant images are rendered in "low-poly," a computer graphics style using geometric polygon shapes to create a 3-D effect. As in paint-by-number, each template is divided into hundreds of spaces, each with a number that corresponds to a particular sticker. Find the sticker, peel it, and place it in the right space. Add the next, and the next, and the next and voila! It's a rocket ship blasting through space. A Tyrannosaurus rex prowling his domain. A pickup truck hauling its load. A friendly toucan hanging on his perch. Kids will love watching these pictures come to life. Plus, each is suitable for framing or the fridge.
