endometrial (uterine lining) cancer do.

Bing: Cancer Is Not A Disease

Cervical cancer is among the most common cancers and a leading cause of cancer-related deaths in low- and middle-income countries, where screening tests and treatment of early cervical cell changes are not readily available. How is HPV Transmitted? HPV passes easily between sexual partners.

Breast Cancer Risk Factors You Cannot Change | Genetic

Cell Biology of Cancer. The cell is the fundamental unit of life. It is the smallest structure of the body capable of performing all of the processes that define life. Each of the organs in the body, such as the lung, breast, colon, and brain, consists of specialized cells that carry out the organ's functions such as the transportation of oxygen, digestion of nutrients, excretion of waste

Cancer | CDC - Centers for Disease Control and Prevention

A risk factor is anything that increases your chances of getting a disease, such as breast cancer. But having a risk factor, or even many, does not mean that you are sure to get the disease. Some risk factors for breast cancer are things you cannot change, such as getting older or inheriting certain gene changes.
