5G is about to be rolled-out across many countries - but what are the risks to your health? Dr Mercola, author of the most visited health website, explains what electromagnetic fields are, where you find them in your daily life, how they affect you and the proven toll that they have on conditions such as cancer, heart disease and neuropsychiatric illnesses. Dr Mercola offers actionable strategies to protect yourself at home, at work and out in the world, and to repair the damage done at a cellular level.

When Thomas Edison began wiring New York City with a direct current electricity distribution system in the 1880s, he gave humankind the magic of electric light, heat, and power; in the process, though, he inadvertently opened a Pandora's Box of unimaginable illness and death. *Dirty Electricity* tells the story of Dr. Samuel Milham, the scientist who first alerted the world about the frightening link between occupational exposure to electromagnetic fields and human disease. Milham takes readers through his early years and education, following the twisting path that led to his discovery that most of the twentieth century diseases of civilization, including cancer, cardiovascular disease, diabetes, and suicide, are caused by electromagnetic field exposure. In the second edition, he explains how electrical exposure does its damage, and how electricity is causing our current epidemics of asthma, diabetes and obesity. Dr. Milham warns that because of the recent proliferation of radio frequency radiation from cell phones and towers, terrestrial antennas, Wi-Fi and Wi-max systems, broadband internet over power lines, and personal electronic equipment, we may be facing a looming epidemic of morbidity and mortality. In *Dirty Electricity*, he reveals the steps we must take, personally and as a society, to coexist with this marvelous but dangerous technology.

immunity from a pediatrician who's both knowledgeable about the latest scientific research and respectful of a family's risk factors, health history, and concerns In *The Vaccine-Friendly Plan*, Paul Thomas, M.D., presents his proven approach to building immunity: a new protocol that limits a child's exposure to aluminum, mercury, and other neurotoxins while building overall good health. Based on the results from his pediatric practice of more than eleven thousand children, as well as data from other credible and scientifically minded medical doctors, Dr. Paul's vaccine-friendly protocol gives readers

- recommendations for a healthy pregnancy and childbirth
- vital information about what to expect at every well child visit from birth through adolescence
- a slower, evidence-based vaccine schedule that calls for only one aluminum-containing shot at a time
- important questions to ask about your child's first few weeks, first years, and beyond
- advice about how to talk to health care providers when you have concerns
- the risks associated with opting out of vaccinations
- a practical approach to common illnesses throughout the school years
- simple tips and tricks for healthy eating and toxin-free living at any age

*The Vaccine-Friendly Plan* presents a new standard for pediatric care, giving parents peace of mind in raising happy, healthy children. Praise for *The Vaccine-Friendly Plan* "Finally, a book about vaccines that respects parents! If you choose only one book to read on the topic, read *The Vaccine-Friendly Plan*. This impeccably researched, well-balanced book puts you in the driver's seat and empowers you to make conscientious vaccine decisions for your family."—Peggy O'Mara, editor and publisher, *Mothering Magazine* "Sure to appeal to readers of all kinds as a friendly, no-nonsense book that cuts through the rhetoric surrounding vaccines. It offers validation to those who avoid some or all, while offering those who do want to vaccinate help on how to do so safely. This is a great book for anyone with children in their lives."—*Natural Mother* "A valuable, science-supported guide to optimizing your child's health while you navigate through complex choices in a toxic, challenging

On July 22, 2009, a special meeting was held with twenty-four leading scientists at the National Institutes of Health to discuss early findings that a newly discovered retrovirus was linked to chronic fatigue syndrome (CFS), prostate cancer, lymphoma, and eventually neurodevelopmental disorders in children. When Dr. Judy Mikovits finished her presentation the room was silent for a moment, then one of the scientists said, “Oh my God!” The resulting investigation would be like no other in science. For Dr. Mikovits, a twenty-year veteran of the National Cancer Institute, this was the midpoint of a five-year journey that would start with the founding of the Whittemore-Peterson Institute for Neuro-Immune Disease at the University of Nevada, Reno, and end with her as a witness for the federal government against her former employer, Harvey

Whittemore, for illegal campaign contributions to Senate Majority Leader Harry Reid. On this journey Dr. Mikovits would face the scientific prejudices against CFS, wander into the minefield that is autism, and through it all struggle to maintain her faith in God and the profession to which she had dedicated her life. This is a story for anybody interested in the peril and promise of science at the very highest levels in our country.

Public health officials state that vaccines are safe and effective, but the truth is far more complicated. Vaccination is a serious medical intervention that always carries the potential to injure and cause death as well as to prevent disease. Coercive vaccination policies deprive people of free and informed consent—the hallmark of ethical medicine. Americans are increasingly concerned about vaccine

safety and the right to make individual, informed choices together with their healthcare practitioners. Vaccine Epidemic focuses on the searing debate surrounding individual and parental vaccination choice in the United States. Habakus, Holland, and Rosenberg edit and introduce a diverse array of interrelated topics concerning the explosive vaccine controversy, including the ethics of vaccination mandates, corrupting conflicts of interest in the national vaccine program, and personal narratives of parents, children, and soldiers who have suffered vaccine injury. Newly updated with additional chapters focusing on institutional scientific misconduct, mandates for healthcare workers, concerns about HPV vaccine development, and the story behind the Supreme Court's recent vaccine decision, Vaccine Epidemic remains the essential handbook for the vaccination choice movement and required reading for all people contemplating vaccination for themselves and their children.

As Christianity, the world's most popular religion, approaches its 2,000-year anniversary, more have begun to question mainstream dogma than ever before. Whether political corruption, scientific fraud, medical tyranny, or many other topics, humans are waking up to the fact that much of what they were promised to be true was instead deception-lies meant to cloud the truth and give power to those who deceived them. This realization has caused many to question whether global warming is a man-made phenomenon. It has caused millions of parents to reconsider vaccines-once considered a sacrosanct rite of passage for any newborn child. What if the Christianity we were taught was similarly misrepresented? Within a few hundred years after the resurrection of Jesus, distortions began to creep into Christianity from the pagan belief systems which surrounded it. Over the course of hundreds of years, man-made doctrines have accumulated and warped the Christian

Why are more parents choosing natural immunity for their children? When I first heard that people were purposefully not vaccinating their children, I was shocked. Vaccines have been described as the most incredible medical invention of all time—a miracle of science and technology that has saved the lives of untold millions. I couldn't believe that seemingly intelligent, educated parents were purposefully foregoing vaccines for their children, and in fact, were so convinced these medical procedures were harming us, they would go out of their way to try to convince others. When a close friend of mine told me that his infant child was going to be unvaccinated, I thought he was completely insane. After much coaxing, he convinced me to do my own research and challenge him on his beliefs. A few months later, I had read things about vaccines and disease that I had never heard before. Things that no one—including our pediatrician—had ever mentioned. I was convinced there was a giant conspiracy to try and discredit vaccines, but after diving headfirst into recent scientific research seldom mentioned in the news, I eventually came to believe much differently about

vaccines and the diseases they are supposed to protect us from. This short book will take you along the same journey I made as I transitioned from a dedicated vaccinating parent to someone who now questions whether any vaccines are actually worth the risk, even in third world countries. It barely scratches the surface of this, the greatest debate of our time, but if nothing else, will give you a clear idea as to why an increasing number of parents are raising their children unvaccinated.

In *How to End the Autism Epidemic*, Generation Rescue's co-founder J.B. Handley offers a compelling, science-based explanation of what's causing the autism epidemic, the lies that enable its perpetuation, and the steps we must take as parents and as a society in order to end it. While many parents have heard the rhetoric that vaccines are safe and effective and that the science is settled about the relationship between vaccines and autism, few realize that in the 1960s, American children received three vaccines compared to the thirty-eight they receive today. Or that when parents are told that the odds of an adverse reaction are "one in a million," the odds are actually one in fifty. Or that in the 1980s, the rate of autism was one in ten thousand children. Today it's one in thirty-six. Parents, educators, and social service professionals around the country are sounding an alarm that we are in the midst of

# Free Reading Crooked Man Made Disease Explained The Incredible Story Of Metal Microbes And Medicine Hidden Within Our Faces

a devastating public health crisis—one that corresponds in lockstep with an ever-growing vaccine schedule. Why do our public health officials refuse to investigate this properly—or even acknowledge it? In *How to End the Autism Epidemic*, Handley confronts and dismantles the most common lies about vaccines and autism. He then lays out, in detail, what the truth actually is: new published science links the aluminium adjuvant used in vaccines to immune activation events in the brains of infants, triggering autism; and there is a clear legal basis for the statement that vaccines cause autism, including previously undisclosed depositions of prominent autism scientists under oath. While Handley's argument is unsparing, his position is ultimately moderate and constructive: we must continue to investigate the safety of vaccines, we must adopt a position of informed consent, and every individual vaccine must be considered on its own merits. This issue is far from settled. By refusing to engage with parents and other stakeholders in a meaningful way, our public health officials destroy the public trust and enable the suffering of countless children and families.

In light of the discovery of Autoimmune Syndrome Induced by Adjuvants, or ASIA, *Vaccines and Autoimmunity* explores the role of adjuvants – specifically aluminum in different vaccines – and how they can induce diverse autoimmune clinical manifestations in genetically prone individuals. *Vaccines and Autoimmunity* is divided into three sections; the first contextualizes the role of adjuvants in the framework of autoimmunity, covering the mechanism of action of adjuvants, experimental models of adjuvant induced autoimmune diseases, infections as adjuvants, the Gulf War Syndrome, sick-building syndrome (SBS), safe vaccines, toll-like receptors, TLRs in vaccines, pesticides as adjuvants, oil as adjuvant, mercury, aluminum and autoimmunity. The following section reviews literature on vaccines that have induced autoimmune conditions such as MMR and HBV, among others. The final section covers diseases in which vaccines were known to be the solicitor – for instance, systemic lupus erythematosus – and whether it can be induced by vaccines for MMR, HBV, HCV, and others. Edited by leaders in the field, *Vaccines and Autoimmunity* is an invaluable resource for advanced students and researchers working in pathogenic and epidemiological studies.

believers to fear, shame, and scapegoat anyone foolish enough to question the sanctity of vaccines. Such an environment is not the domain of science; rather it's the breeding ground of tyranny. Jabbed exposes this tyranny. From polio and smallpox to medical journals, medical curricula, congressional hearings, regulatory policies, White House statements, and executive orders, Jabbed shines light on the dark underbelly of Big Pharma, Big Medicine, and Big Government. A vaccine informed public is the only thing that will have the power to stop vaccine industry sociopaths and to hold them accountable for their crimes. Jabbed informs and immunizes against three of the most dangerous epidemics in history: tyranny, greed, and corruption. Once immunized, the growing vaccine-informed community will have the power to stand up and dismantle the vaccine paradigm and program and to punish the perpetrators of what may well be the greatest medical fraud ever perpetrated on the human race: vaccines.

When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Why do babies have lopsided smiles? Why are so many people's eyes misaligned? What started as a simple search to understand this phenomenon turned into a two-year quest that uncovered hidden links between our crooked faces and some of the most puzzling diseases of our time. From autism to Alzheimer's and from chronic fatigue syndrome to Crohn's disease, Crooked methodically goes through the most recent scientific research and connects the dots from the outbreak of metallic medicine in 1800s England to the eruption of neurological and autoimmune disorders so many are suffering from today. If the theories put forth in this book are true, the convergence of metals, microbes and medicine that started two hundred years ago may have set humanity on a path of suffering that could make the deadliest epidemics in history pale in comparison. Thankfully, for the millions who are afflicted, who may have found nothing to explain the cause of their suffering - these same theories could also illuminate the path to healing and recovery. ## **Vaccines and Autoimmunity**

Over the past 50 years, rates of chronic illness, learning disabilities,

# Free Reading Crooked Man Made Disease Explained The Incredible Story Of Metal Microbes And Medicine Hidden Within Our Faces

and allergies in children have exploded--1 in 6 children has a diagnosed learning disorder, 1 in 50 has autism, and 1 in 13 has severe food allergies. Instead of blaming genetics or increased awareness and diagnosis, author Thomas Cowan, MD, attributes these rising numbers to our current vaccination policy. In *Vaccines, Auto-Immunity, and the Assault on Childhood*, Cowan combines his years of experience as a medical practitioner with his research into the history and science of vaccines to show how childhood illnesses, which help children to develop a robust immune system, are now eschewed by conventional medicine in favor of an increasing array of vaccinations that do more harm than good. Invoking philosopher Rudolph Steiner's vision of vaccines as inspired by "spirits of darkness," Cowan brings to light the various ways in which scientists and government officials work to promote a vaccine program that only increases suffering. Along the way he questions commonly held views of cell biology, the role of water in the body, and the spatial and spiritual components of autism. Additionally, he provides hope of recovery in the form of a nontoxic course of treatment for those suffering chronic inflammation and other averse immune responses to vaccines. Cowan's thoughtfully bold writing takes us on a journey into the history of illness, questioning the true origins of diseases such as polio, and asking important questions, such as: why did paralytic polio make a sudden appearance in the US in the years between 1916-1918? The answers lie far beyond what conventional medicine would have us believe. *Vaccines, Auto-Immunity, and the Assault on Childhood* asks that we re-examine not only our modern health system but our relationship with the spiritual world. Only then will we find true health.

journalist who endured persistent back pain for decades—delivers the definitive book on the subject: an essential examination of all facets of the back pain industry, exploring what works, what doesn't, what may cause harm, and how to get on the road to recovery. In her effort to manage her chronic back pain, investigative reporter Cathryn Jakobson Ramin spent years and a small fortune on a panoply of treatments. But her discomfort only intensified, leaving her feeling frustrated and perplexed. As she searched for better solutions, she exposed a much bigger problem. Costing roughly \$100 billion a year, spine medicine—often ineffective and sometimes harmful—exemplified the worst aspects of the U.S. health care system. The result of six years of intensive investigation, *Crooked* offers a startling look at the poorly identified risks of spine medicine, and provides practical advice and solutions. Ramin interviewed scores of spine surgeons, pain management doctors, physical medicine and rehabilitation physicians, exercise physiologists, physical therapists, chiropractors, specialized bodywork practitioners. She met with many patients whose pain and desperation led them to make life-altering decisions, and with others who triumphed over their limitations. The result is a brilliant and comprehensive book that is not only important but essential to millions of back pain sufferers, and all types of health care professionals. Ramin shatters assumptions about surgery, chiropractic methods, physical therapy, spinal injections and painkillers, and addresses evidence-based rehabilitation options—showing, in detail, how to avoid therapeutic dead ends, while saving money, time, and considerable anguish. With *Crooked*, she reveals what it takes to outwit the back pain industry and get on the road to recovery.

A fascinating account of the world's most famous disease-polio-told as you have never heard it before. Epidemics of paralysis began to rage in the early 1900s, seemingly out of nowhere. Doctors, parents, and health officials were at a loss to explain why this formerly unheard of disease began paralyzing so many children-usually starting in their legs, sometimes moving up through their abdomen and arms. For an unfortunate few, it could paralyze the muscles that allowed them to breathe. Why did this disease start to become such a horrible problem during the late 1800s? Why did it affect children more often than adults? Why was it originally called teething paralysis by mothers and their doctors? Why were animals so often paralyzed during the early epidemics when it was later

Every week, tens of thousands of children across America are injected with the DPT (diphtheria-pertussis-tetanus) vaccine. The law requires it, and most children will get four DPT shots before they are two years old. But what if one of the components of the vaccine was not safe? What if it caused not only pain, swelling, screaming, and high fever, but also shock, convulsions, brain damage, and even death? And, to make matters worse, what if there were a safer alternative but parents didn't know about it? Wouldn't the government require the drug manufacturers to produce the safer vaccine to protect the lives of the children who might otherwise suffer the shot's crippling side effects? The answer is, unfortunately, no. *A Shot in the Dark* is a chilling account of just how dangerous the whole-cell pertussis vaccine (the "P" part of the DPT shot) has proven to be. It provides accurate research into the history of the vaccine's development and usage. It exposes the roles played by the FDA and drug companies. It tells the tragic stories of the young victims of the vaccine. This book is also a guide for rightfully concerned parents who are looking for answers to important questions. What are the warning signs to look for to tell if your child is likely to be sensitive to the vaccine? What should parents ask their doctors about the vaccine and their child's medical profile? What is being done, here and in other countries, to combat this frightening situation? What can parents do now to help? *A Shot in the Dark* is a responsible, eye-opening look at a potential problem that every parent of every young child living in this country must

Thomas Cowan was a 20-year-old Duke grad—bright, skeptical, and already disillusioned with industrial capitalism—when he joined the Peace Corps in the mid-1970s for a two-year tour in Swaziland. There, he encountered the work of Rudolf Steiner and Weston A. Price—two men whose ideas would fascinate and challenge him for decades to come. Both drawn to the art of healing and repelled by

the way medicine was—and continues to be—practiced in the United States, Cowan returned from Swaziland, went to medical school, and established a practice in New Hampshire and, later, San Francisco. For years, as he raised his three children, suffered the setback of divorce, and struggled with a heart condition, he remained intrigued by the work of Price and Steiner and, in particular, with Steiner's provocative claim that the heart is not a pump. Determined to practice medicine in a way that promoted healing rather than compounded ailments, Cowan dedicated himself to understanding whether Steiner's claim could possibly be true. And if Steiner was correct, what, then, is the heart? What is its true role in the human body? In this deeply personal, rigorous, and riveting account, Dr. Cowan offers up a daring claim: Not only was Steiner correct that the heart is not a pump, but our understanding of heart disease—with its origins in the blood vessels—is completely wrong. And this gross misunderstanding, with its attendant medications and risky surgeries, is the reason heart disease remains the most common cause of death worldwide. In *Human Heart, Cosmic Heart*, Dr. Thomas Cowan presents a new way of understanding the body's most central organ. He offers a new look at what it means to be human and how we can best care for ourselves—and one another.

"When President Nixon launched the War on Cancer with the signing of the National Cancer Act of 1971 and the allocation of billions of research dollars, it was amidst a flurry of promises that a cure was within reach. The research establishment was trumpeting the discovery of oncogenes, the genes that supposedly cause cancer. As soon as we identified them and treated cancer patients accordingly, cancer would become a thing of the past. Fifty years later it's clear that the War on Cancer has failed--despite what the cancer industry wants us to believe. New diagnoses have continued to climb; one in three people in the United States can now expect to battle cancer during their lifetime. For the majority of common cancers, the search for oncogenes has not changed the treatment: We're still treating with the same old triad of removing (surgery), burning out (radiation), or poisoning (chemotherapy). In *Cancer and the New Biology of Water*, Thomas Cowan, MD, argues that this failure was inevitable because the oncogene theory is incorrect--or at least incomplete--and based on a flawed concept of biology in which DNA controls our cellular function and therefore our health. Instead, Dr. Cowan tells us, the somatic mutations seen in cancer

cells are the result of a cellular deterioration that has little to do with oncogenes, DNA, or even the nucleus. The root cause is metabolic dysfunction that deteriorates the structured water that forms the basis of cytoplasmic health. Despite mainstream medicine's failure to bring an end to suffering or deliver on its promises, it remains illegal for physicians to prescribe anything other than the "standard of care" for their cancer patients, despite the fact that gentler, more effective, and more promising treatments exist"--

There's a silent epidemic in western civilization, and it is right under our noses. Our jaws are getting smaller and our teeth crooked and crowded, creating not only aesthetic challenges but also difficulties with breathing. Modern orthodontics has persuaded us that braces and oral devices can correct these problems. While teeth can certainly be straightened, what about the underlying causes of this rapid shift in oral evolution and the health risks posed by obstructed airways? Sandra Kahn and Paul R. Ehrlich, a pioneering orthodontist and a world-renowned evolutionist, respectively, present the biological, dietary, and cultural changes that have driven us toward this major health challenge. They propose simple adjustments that can alleviate this developing crisis, as well as a major alternative to orthodontics that promises more significant long-term relief. Jaws will change your life. Every parent should read this book.

helped you see the world as a more profound place, gave you sound advice to help you make your way through it. For Mitch Albom, that person was Morrie Schwartz, his college professor from nearly twenty years ago. Maybe, like Mitch, you lost track of this mentor as you made your way, and the insights faded, and the world seemed colder. Wouldn't you like to see that person again, ask the bigger questions that still haunt you, receive wisdom for your busy life today the way you once did when you were younger? Mitch Albom had that second chance. He reconnected with Morrie in the last months of the older man's life. Knowing he was dying, Morrie visited with Mitch in his study every Tuesday, just as they used to back in college. Their rekindled relationship turned into one final "class:" lessons in how to live. Tuesdays with Morrie is a magical chronicle of their time together, through which Mitch shares Morrie's lasting gift with the world.

## **The Fault in Our Stars**

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color

## **Red Pill Gospel**

A riveting thriller reminiscent of *The Hot Zone*, this true story dives into the mystery surrounding one of the most controversial and misdiagnosed conditions of our time—Lyme disease—and of Willy Burgdorfer, the man who discovered the microbe behind it, revealing his secret role in developing bug-borne biological weapons, and raising terrifying questions about the genesis of the epidemic of tick-borne diseases affecting millions of Americans today. While on vacation on Martha's Vineyard, Kris Newby was bitten by an unseen tick. That one bite changed her life forever, pulling her into the abyss of a devastating illness that took ten doctors to diagnose and years to recover: Newby had become one of the 300,000 Americans who are afflicted with Lyme disease each year. As a science writer, she was driven to understand why this disease is so misunderstood, and its patients so mistreated. This quest led her to Willy Burgdorfer, the Lyme microbe's discoverer, who revealed that he had developed bug-borne bioweapons during the Cold War, and believed that the Lyme epidemic was started by a military experiment gone wrong. In a superb, meticulous work of narrative journalism, *Bitten* takes readers on a journey to investigate these claims, from biological weapons facilities to interviews with biosecurity experts and microbiologists doing cutting-edge research,

all the while uncovering darker truths about Willy. It also leads her to uncomfortable questions about why Lyme can be so difficult to both diagnose and treat, and why the government is so reluctant to classify chronic Lyme as a disease. A gripping, infectious page-turner, Bitten will shed a terrifying new light on an epidemic that is exacting an incalculable toll on us, upending much of what we believe we know about it.

### **Tuesdays with Morrie**

It is a mistake to think that wars only concern armies involved in active engagement. Nothing is farther from the truth. The real forces of evil wage a financial war. The dark princes of debt finance have gained leverage over every important social, economic, and political institution—including the health care delivery system. In *AIDS, Opium, Diamonds, and Empire*, author Nancy Turner Banks draws the connections between free market strategies, the destruction of national sovereignty by the process of globalization, and AIDS as one of the health consequences of a neo-Darwinian philosophy. Through meticulous research, Banks found a medicalpharmaceutical- industrial complex that was taken over one hundred years ago by the titans of financial capitalism. Their aim was to create profit, not to conquer disease. This book of social history points to a cauldron of historical events that contributed to the HIV/AIDS crisis. *AIDS, Opium, Diamonds, and Empire* tells the dramatic story of a financial ideology that is damaging to everything that it means to be human. It is the story of profits over people. In the end, it is the story of hope and how we can regain our sanity and our health in a world gone mad.

in Western cultures? Over four million people in the United States alone are affected by peanut allergies, while there are no reported cases in India, a country where peanuts are the primary ingredient in many baby food products. Where did this allergy come from, and does medicine play any kind of role in the phenomenon? After her own child had an anaphylactic reaction to peanut butter, historian Heather Fraser decided to discover the answers to these questions. In *The Peanut Allergy Epidemic*, Fraser delves into the history of this allergy, trying to understand why it largely develops in children and studying its relationship with social, medical, political, and economic factors. In an international overview of the subject, she compares the epidemic in the United States to sixteen other geographical locations, finding that in addition to the United States, in countries such as Canada, the UK, Australia, and Sweden there is a one in fifty chance that a child, especially a male, will develop a peanut allergy. Fraser also highlights alternative medicines and explores issues of vaccine safety and other food allergies, making his book a must-read for every parent, teacher, and health professional.

## **The 48 Laws of Power**

The Deeper State is about the elites, their secret societies, world power centers and evil motivations behind the chaotic contemporary world pressing all life toward a final one world empire. The contemporary trigger that briefly lifted the veil on this darkness was the election of President Donald Trump who exposed the power brokers, their evil agenda, their techniques and ideology much like when one is shocked when lifting a rock in the forest to discover hidden underneath slimy poisonous vipers. Deep State is a term that has recently come into vogue to describe the forces in Washington and around the country that are rallying to overturn the election of President Trump. But there is far more to this organized resistance,

there is an even deeper state that must be exposed to fully understand the imminent danger. THE DEEPER STATE discloses for the first time Behind the scenes super elites who promote a false panacea through promises of globalization. How globalist are taking over the world's power centers; The instruments of global power and the secret hands of the globe's evil puppet masters. The history of the world's super class. The marriage of modern globalism and progressivism with deep roots in Marxism and Darwinism. The one-world government elite behind the European Union. The spiritual aspects of an invisible war and its Achilles heel. Just when all hope seems lost there is an ancient leader that provides sage advice for these tumultuous times. Yes, God has pre-ordained the final outcome but until that time, which could be soon, we can make a difference in spite of the rigid and seemingly overwhelming push by the elites and their evil ally in the unseen realm.
