Running Your First Marathon

Learn how to run faster, unlock your potential, and reach peak performance with training advice from a former Olympic trials marathoner and coach to Olympians like Dathan Ritzenhein. Hudson is the most innovative running coach to come along in a generation. Until now, only a handful of elite athletes have been able to benefit from his methods. Now *Run Faster from the 5K to the Marathon* shows all runners how to coach themselves as confidently and effectively as Brad coaches his world-class athletes. Becoming your own best coach is the ticket to running faster at any distance. First you will learn to assess your abilities. Then you'll learn how to devise a training program specifically geared to you. Filled with easy-to-follow sample training programs for distances ranging from the 5K to the marathon and abilities ranging from novice to advanced, *Run Faster* is the cutting-edge guide for optimal performance. With Hudson's guidance, you can train smarter and more effectively—and avoid injury. And you'll soon be running faster than you ever thought possible!

The Runner's World Big Book of Marathon and Half-Marathon Training

Every day, people are reaching their get-up-or-give-up moments and resolving to change. And they're realizing that running is the simplest, cheapest, and most effective way to lose weight, gain confidence, and relieve stress. For newcomers, the obstacles are fierce. There are fears of pain and embarrassment. There are schedules jam-packed with

stressful jobs, long commutes, endless meetings, and sticky-fingered toddlers. The Runner's World Big Book of Running for Beginners provides all the information neophytes need to take their first steps, as well as inspiration for staying motivated. The book presents readers with tips for smart nutrition and injury prevention that enable beginning runners to achieve gradual progress (by gearing up for a 30-minute run, a 5-K, or even a 5-miler). Above all, it shows newbies just how fun and rewarding the sport can be, thanks to the help of several "real runner" testimonials.

The Runner's Workout Handbook

Finally, runners at all levels can improve their race times while training less, with the revolutionary Furman Institute of Running and Scientific Training (FIRST) program. Hailed by the Wall Street Journal and featured twice in six months in cover stories in Runner's World magazine, FIRST's unique training philosophy makes running easier and more accessible, limits overtraining and burnout, and substantially cuts the risk of injury, while producing faster race times. The key feature is the "3 plus 2" program, which each week consists of: -3 quality runs, including track repeats, the tempo run, and the long run, which are designed to work together to improve endurance, lactate-threshold running pace, and leg speed -2 aerobic cross-training workouts, such as swimming, rowing, or pedaling a stationary bike, which are designed to improve endurance while helping to avoid burnout With detailed training plans for 5K, 10K, half marathon, and marathon, plus tips for goal-setting, rest, recovery, injury rehab and prevention, strength training, and nutrition, this program will change the way runners think about and train for competitive races. Amby Burfoot, Runner's World executive editor and Boston Marathon winner, calls the FIRST training program "the most detailed, well-organized, and scientific training program for runners that I have ever seen."

Runner's World Run Less Run Faster

One of the BBC's '100 Novels That Shaped Our World' A worldwide bestseller and the first part of Achebe's African Trilogy, *Things Fall Apart* is the compelling story of one man's battle to protect his community against the forces of change Okonkwo is the greatest wrestler and warrior alive, and his fame spreads throughout West Africa like a bush-fire in the harmattan. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. First published in 1958, Chinua Achebe's stark, coolly ironic novel reshaped both African and world literature, and has sold over ten million copies in forty-five languages. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in *Arrow of God* and *No Longer at Ease*. 'His courage and generosity are made manifest in the work' Toni Morrison 'The writer in whose company the prison walls fell down' Nelson Mandela 'A great book, that bespeaks a great, brave, kind, human spirit' John Updike With an Introduction by Biyi Bandele

The Complete Running and Marathon Book

Introduction to Sports Biomechanics

Planning algorithms are impacting technical disciplines and industries around the world, including robotics, computer-aided design, manufacturing, computer graphics, aerospace applications, drug design, and protein folding. This coherent and comprehensive book unifies material from several sources, including robotics, control theory, artificial intelligence, and algorithms. The treatment is centered on robot motion planning, but integrates material on planning in discrete spaces. A major part of the book is devoted to planning under uncertainty, including decision theory, Markov decision processes, and information spaces, which are the 'configuration spaces' of all sensor-based planning problems. The last part of the book delves into planning under differential constraints that arise when automating the motions of virtually any mechanical system. This text and reference is intended for students, engineers, and researchers in robotics, artificial intelligence, and control theory as well as computer graphics, algorithms, and computational biology.

Modern civilization relies on a functioning information infrastructure. As a result, dependability has become a central issue in all disciplines of systems engineering and software architecture. Theories, methods and tools that help to master the problems encountered in the design process and the management of operations are therefore of utmost importance for the future of information and communication technology. The present volume documents the results of a research program on Dependable Information and Communication Systems (DICS). The members of the project met in two workshops organized

by the Hasler Foundation. This state-of-the-art survey contains 3 overview articles identifying major issues of dependability and presenting the latest solutions, as well as 10 carefully selected and revised papers depicting the research results originating from those workshops. The first workshop took place in M ü nchenwiler, Switzerland, in March 2004, and the second workshop, which marked the conclusion of the projects, in L ö wenberg, Switzerland, in October 2005. The papers are organized in topical sections on surveys, dependable software, dependable computing, and dependable networks.

If you've ever fancied running a 5k or just getting fit enough to run 5 kilometers in one go (that's 3.1 miles to you and me!) and you want to do it in the shortest amount of time, without risking injury, boredom or stagnation, then this book is exactly the one for you. '5k Training For Beginners - From Couch to 5k Runner In 8 Weeks Or Less,' contains everything you need to know about running a 5k in the fastest, most efficient and fun way. The book comes in 2 parts so if you're in to reading all about why and how your body changes then start by reading part 1. Part 2 deals with the physical side of running and jogging and features 4 fantastic simple to follow running programs for beginners of all shapes, sizes and fitness levels. You'll have access to some of the most up to date, cutting edge techniques to help improve your running. THE PROGRAMS AND TECHNIQUES IN THIS BOOK WORK, plain and simple. They've been honed and refined over 12 years having been road tested by a myriad of clients from all types of backgrounds and fitness levels. You won't be bored following this unique, time saving 5k training program AND you won't need to start running endless miles each week in order to see results. If you could get the same benefits by doing a shorter more enjoyable and invigorating run as opposed to a long, arduous and grueling one, which

one would you choose? Hopefully you chose the first option, because this is what the whole concept behind '5k Training for Beginners' is all about. Here are 4 reasons why you should choose this running book. You'll be able to successfully and comfortably run a 5k at the end of your training; you'll have accomplished something that most people only think about doing. This program will help you lose weight quickly, build muscle and tone your body. By committing to something like this, the chances are as a side effect, you'll get in to the best shape of your life! You'll radically improve your health. Keep up with your training and you'll have more energy, be thinner, happier and live longer, you'll just feel great most of the time. Supercharge your energy levels on demand. You'll know exactly how to create your own 'feel good factor' which you can turn on and off like a tap. This program has been designed for beginners and that's the way it's intended, but if you're an experienced runner you'll learn a few things to help you to get better, faster and reduce the amount of time you need to spend running and jogging. No grueling or tedious long distance running needed AND no special equipment required. Here are some more of the secrets you'll learn inside: How the biggest mistake that most new runners make is to set off at the beginning of their run, like a dog out of the traps way too fast. Meaning within a short distance they need to stop because they're too tired and breathless to carry on. This is one of the worst ways of getting better at running because you'll need to rest after only a short amount of time. You'll discover how using advanced running techniques throughout your 5k training will transform your fitness and stamina levels in just days never mind weeks. As well as this, these great strategies will actually reduce the overall time you need to spend on your training! It's designed for anyone who wants to start running but hasn't got hours to spare each week to do so. This truly is THE only running book you'll ever need.

system can prepare you for marathon success. With a modern outlook on training schedules, innovative exercises for injury prevention and maximizing time spent training, the Simple Marathon Training system prepares you to toe the line with the confidence to run your best marathon. The Simple Marathon Training system has improved marathon times and the overall experience for many busy adult runners with hectic lives. This system works. It will for you, too. Included in Simple Marathon Training is a day-by-day schedule which includes running assignments as well as the crucial element missing from most training plans: core strength, hip strength and hip mobility exercises. You don't have to look at a sequence of photos in the book to learn these routines, rather, you will be able to watch all these strength and mobility videos online, for free. The incorporation of training videos into a sound marathon training program makes Simple Marathon a one of a kind system; a book that will help any committed athlete run a great marathon. The Geek Out section at the back of the book is another unique aspect of Simple Marathon Training. The Geek Outs are written by world-renowned physiologists and professional marathoners as well as Coach Jay's clients who have been using the system for several years to run PRs. You'll learn why it's best to do your hardest strength and mobility work on the same day as your workouts and long runs. You'll learn the correct method for fueling during a marathon. Information on imagery leading up to the race and mental skills to use during race day are just some of the topics in the Geek Out section. The bottom line is, if you're a busy adult with a hectic life, Simple Marathon Training is the right training book for you. "Jay's training system works beautifully for runners who aim for excellence in every area of their lives-athletically, personally and professionally. He understands that we're busy but still want to run our best; he's helped me do just that." Cindy Kuzma, Freelance health and fitness writer and contributing editor to Runner's World Magazine

Inspiration and practical tips for runners who prioritize enjoyment over pace and embrace their place as an "average" runner. In her first book, popular runner blogger Amanda Brooks lays out the path to finding greater fulfillment in running for those who consider themselves "middle of the pack runners" -- they're not trying to win Boston (or even qualify for Boston); they just want to get strong and stay injury-free so they can continue to enjoy running. Run to the Finish is not your typical running book. While it is filled with useful strategic training advice throughout, at its core, it is about embracing your place in the middle of the pack with humor and learning to love the run you've got without comparing yourself to other runners. Mixing practical advice like understanding the discomfort vs. pain, the mental side of running, and movements to treat the most common injuries with more playful elements such as "Favorite hilarious marathon signs" and "Weird Thoughts We all Have at the Start Line," Brooks is the down-to-earth, inspiring guide for everyone who wants to be happier with their run.

Fast 5K

Jeff's quest for the injury-free marathon training program led him to develop group training programs in 1978, and to author Runner's World articles which have been used by hundreds of thousands of runners of all abilities. His training schedules have inspired the second wave of marathoners who follow the Galloway RUN-WALK-RUN™, low mileage, three-day suggestions to an over 98% success rate. Jeff has worked with over 200,000 average people in training for specific goals. Jeff is an inspirational speaker to over 200 running and fitness sessions each year. His innovative ideas have opened up the possibility of running and completing a marathon to almost everyone. Philosophically, Jeff believes that we were all designed to run and walk, and he keeps finding ways to bring more people into the positive world of exercise.
