Encountering ETI

This is the casebook of the world's only officially recognized UFO encounter that took place in the UK in December 1980. Previous accounts of the Rendlesham Forest incident have been flawed: people with axes to grind and little access to primary sources and discreditable single eyewitness accounts. Georgina Bruni has had access to police, Ministry of Defence and US military sources and her casebook reveals fresh information on the incident and the possible alien encounter that ensued. It includes interviews with those involved as well as other never-before-reported incidents in the area. The casebook also reveals details of the aftermath and the harsh treatment meted out to those who wavered from the "don't ask, don't tell" line of officialdom. 'While twenty years have passed, she brings new light to this story that just won't go away' Major General Gordon E. Williams, USAF (Retired)

The Cash-Landrum UFO Incident

'Encountering ETI' weaves together scientific knowledge and spiritual faith in a cosmic context. It explores consequences of Contact between terrestrial intelligent life (TI) and extraterrestrial intelligent life (ETI). Humans will face cosmic displacement if there are other complex, technologically advanced intelligent beings in the universe; our economic structures and religious beliefs might need substantial revision. On Earth or in space, humans could encounter benevolent ETI (solicitous of our striving for maturity as a species) or malevolent ETI (seeking our land and goods to benefit themselves, claiming that their 'superior civilization' gives them the right) - or meet both types of species. Earth Encounters of the Third Kind described by witnesses (including Native American elders) suggest that both may have arrived already: some have been accused of shutting down US and USSR ICBM missiles to promote peace; others of mutilating cattle or abducting people, perhaps

to acquire physiological data on biota for scientific study or for other, unknown purposes. Scifi movies such as Avatar and novels like The Martian Chronicles describe humans as malevolent ETI aliens: we do to others what we fear others will do to us. A shared and evolving spiritual materiality could enable humanity to overcome cosmic displacement, and guide TI and ETI in a common quest for meaning and wellbeing on cosmic common ground.

"In December 1980, Larry Warren was a member of the Air Force security police stationed at RAF Bentwaters, a NATO base in Great Britain. On the night of the 28th he was on guard duty when he was taken by truck to join other Air Force personnel to investigate a disturbance in a Rendlesham Forest about five miles away, which turned out to be a landed UFO. This was the third night of UFO activity in the area and by far the most profound. When the men were debriefed the next day, they were warned to tell no one about what they had seen."--Back cover.

Open Skies, Closed Minds

The UFO landing at Socorro has been wrapped in controversy almost from the moment that police officer Lonnie Zamora watched a craft descend and land. Zamora saw alien beings near the craft and a symbol on its side but was told that he shouldn't mention either. Encounter in the Desert reveals—for the first time—exactly what he saw in that arroyo in 1964 and what an examination of the landing revealed to investigators. Socorro wasn't a stand-alone case. Other sightings, some of them nearly as spectacular as Zamora's, were reported at the time. A study of the Air Force investigation of this case reveals an effort, at first, to learn the truth that mutated into a clever attempt to hide the information from the public. Encounter in the Desert reveals all this and much more, including: The first new, in-depth look at the Zamora UFO landing in more than three decades. Other reports of alien creatures sighted around the country at the same time. An examination of the physical evidence found on the landing site. The revelation that there were other witnesses to the craft and the landing.

In a personal, no-nonsense style, Keyhoe provides the details of his investigation; he talks with witnesses, reviews the fascinating history of the phenomenon, and attempts to pry open "the lid of secrecy" the United States Air Force had clamped down on the subject of UFOs.

Encounter in the Desert

The Rendlesham Forest Incident of December 1980, is considered by far the most significant event in UFO history. It was also a unique military-related event, having taken place in Rendlesham Forest just outside the twin bases of RAF Bentwaters and RAF Woodbridge in Suffolk, England - both of which had been transferred to the United States Air Force in 1951 by the British MOD (Ministry of Defence),

becoming one of the largest and most important NATO complexes in Europe during the Cold War. The account given in this book is that of James W. Penniston, a Staff Sergeant at the time of the incident, who was the primary witness who led the investigation in the beginning and had 'Top-Secret clearance' - one of only eight people with Top-Secret clearance working Security at the twin bases. His credibility and honesty were highly respected throughout his years in the USAF. Jim Penniston has teamed-up with author Gary Osborn to present the definitive account of the Rendlesham Incident and the aftermath of events, just as he witnessed and experienced them from the incident itself, which began during the early morning hours of Boxing Day, December 26, 1980 up to April 2014.

Flying Saucers Over the White House

Roswell was only the beginning! An in-depth look at the Rendlesham Forest UFO Incident, the world's most sensational and compelling series of UFO encounters. In 1980, a UFO was tracked on military radar in Rendlesham Forest, England. It landed near two of the most strategically important military bases in NATO, and was approached by military witnesses who touched the hull. This explosive new book tells the full story of this incident, which is set to become better-known than Roswell. Written by Nick Pope, an international bestselling author and former government UFO investigator, working closely with John Burroughs and Jim Penniston, the two officers at the heart of the encounters, Encounter in Rendlesham Forest reveals the first-hand witnesses' full stories for the first time and is supported by numerous formerly-classified documents obtained under the Freedom of Information Act. The inside story of these events and their aftermath will change people's perceptions about UFOs and about the true role played by government, the military and the intelligence agencies.

Pascagoula - The Closest Encounter - My Story By Calvin Parker Foreword by Philip Mantle (FULL COLOUR EDITION) On October 11th, 1973 nineteen year old Calvin Parker and his friend forty two year old Charles Hickson were spending a frustrating evening fishing on the Pascagoula River in Mississippi. Both men loved to fish but tonight's fishing trip would turn out to be one they would never forget. In the early evening both men were startled when a strange craft descended and hovered a few feet above the ground and just a few yards from their location. Before they had any chance to run an opening appeared in this craft and out 'floated' three humanoid creatures. Both men were absolutely terrified when these creatures grabbed them and took them aboard the craft. On the craft both men were subjected to an examination and at one point they were so terrified as they believed they were about to die. Minutes later both Calvin Parker and Charles Hickson were deposited back on the riverbank and the craft departed. Taking off in their car the two terrified witnesses eventually located a public telephone box and phoned the local sheriff. A short time later they were being interviewed at their local sheriff's office. These two disorientated witnesses told their story of their close encounter and abduction by these strange creatures. The next day all hell was let loose as the press descended on this unsuspecting Mississippi town. Calvin Parker, seriously disturbed by these events, has largely remained in the background without ever detailing the full account of what happened that night, how it affected him and his life, and other close encounters he has experienced down the years. Now, for the first time, Calvin Parker tells his story in full. This book, Pascagoula - The

Closest Encounter, tells the story of one of the classic close encounters currently on record. This book features for the first time the full transcript of Calvin Parker's hypnotic regression session with the late Budd Hopkins, one of the world's foremost researchers of this phenomena. The manuscript is also packed full of documents, newspaper cuttings and photographs old and new. This is the full colour edition and a black and white version is also available.

Incident at Exeter, the Interrupted Journey

THE SUNDAY TIMES BESTSELLER 'If you have the slightest interest in unidentified flying objects, you owe it to yourself to read what Nick Pope has to say.' The Independent 'A provocative book, written in a reasoned, dispassionate manner.' Review of Books An overview of the UFO mystery, written by the man who used to run the British Government's UFO project. This is a true insider's account of the phenomenon, and lifts the lid not just on classic cases like Roswell and the Rendlesham Forest incident, but on less well known cases too. This groundbreaking and highly controversial book highlights cases from the US, the UK, and the rest of the world, and Nick draws on his first-hand government experience to reveal what the authorities really know and think about UFOs, alien abductions, crop circles and animal mutilations. Open Skies Closed Minds was featured on Newsnight, serialised in the Daily Mail and reached number three in the hardback non-fiction list, staying in the top ten for ten weeks.

The Rendlesham File: Britain's Roswell? The Rendlesham File: Britain's Roswell? is a scientific investigation into the possible cause of the Rendlesham Forest Incident of December 1980 involving UFO sightings in and around Rendlesham Forest between the twin airbases of RAF Bentwaters and RAF Woodbridge in Suffolk, England. It examines the likely cause of balls of light and a triangular craft that appeared in and around the area seen by the airmen of the twin bases and local civilians. Following a review of the 1974 Berwyn Mountains incident in the summer of 1980 attention was drawn to strange plasma-like balls of light seen at Rendlesham Forest during the following Christmas. What at first appeared to be a simple case of possible earthlights, meteorological and aerial plasma phenomena developed into an investigation which included microwave technology, radar, electromagnetic influences on the human body including the brain, black budget advances in mind control and exotic aviation including stealth and anti-gravity technologies. Many of the black projects examined held answers to the causes with developments in the investigation coming as a result of FBI and CIA files. There was also evidence from astronomical, geophysical and electromagnetic research going back to the late 1800s. This led to significant clues from scientific advances during World War Two with further answers also coming from the 1950s in plasma physics and astronomy, especially plasma cosmology right up to the present day. Some of these advances were also made by scientists working alone away from mainstream science as a result of the taboo nature of their research. This book gathers together these diverse areas of research to show that more than just earthlights occurred that Christmas and in doing so highlights black projects and mainstream scientific research that are significant to many other areas of ufology and other paranormal subjects. It was discovered that everything witnessed during the Rendlesham Forest Incident was seen before, either in and around the forest, or around the world before and since the event. This allowed the scientific investigation to follow the science through to possible answers. In doing so it became obvious that something had heightened and brought together many phenomena that Christmas which would otherwise be seen separately or to a much reduced intensity. Military secrecy and a general view by the Ministry of Defence that this was of no defence significance proved to be wrong and through the black projects and declassified paperwork it was shown that this view by the powers-that-be might be part of the cover. Although much of the scientific conclusions were in place by 1989 developments and further research unfolded over the following decades appearing with an eerie habit of serendipity. These added strength to the conclusions already established. To date this is the only extensive civilian investigation into the science of arguably the most famous sightings in UFO history. The Rendlesham File is the first book written about these events by a UK academic. Andrew Pike is a qualified astrophysicist and a Fellow of the Royal Astronomical Society. The Rendlesham File takes an unbiased scientific look at the UFO sightings in question and out puts all of the information under the microscope. Is there a scientific explanation for these UFO sightings or are they truly the result of something that is yet beyond our scientific capabilities? Open The Rendlesham File and discover the answers for yourself.

UFOs for the 21st Century Mind

Flying Saucers Over the White House is the story of Captain Edward J. Ruppelt, a US Air Force officer who researched UFO sightings in the 1950s and made a concentrated effort to convince the United States Air Force that UFOs exist. Ruppelt, who coined the term 'UFO', headed "Project Blue Book," an assignment designed by the United States government to investigate and report on the existence of unidentified flying objects and their link to extraterrestrial beings. Ruppelt dissected the evidence, separating chance sightings of ordinary objects from true UFO sightings. He eventually wrote The Report on Unidentified Flying Objects, summarizing his findings. In Flying Saucers Over the White House, Bennett examines the life of this "founding father" of ufology, analyzing the evidence and the U.S. government's reporting of this phenomenon for a new generation of readers. COLIN BENNETT has written several books, including The Entertainment Bomb, *Looking for Orthon*, and Politics of the Imagination, which won the Anomalist Award for Best Biography in 2002. After leaving school to become a professional musician, Bennett returned to college to study English at Balliol College at the University of Oxford. He wrote several plays that were performed in London before reinventing himself as an electronics engineer and founding a consulting agency. Bennett currently resides

in London where he continues to write and discover new interests.

The Presidents and UFOs

The author of the controversial bestseller Brain Trust brings his scientific expertise to the chilling true story of unexplained phenomena on Utah's Skinwalker Ranch -- and challenges us with a new vision of reality. For more than fifty years, the bizarre events at a remote Utah ranch have ranged from the perplexing to the wholly terrifying. Vanishing and mutilated cattle. Unidentified Flying Objects. The appearance of huge, otherworldly creatures. Invisible objects emitting magnetic fields with the power to spark a cattle stampede. Flying orbs of light with dazzling maneuverability and lethal consequences. For one family, life on the Skinwalker Ranch had become a life under siege by an unknown enemy or enemies. Nothing else could explain the horrors that surrounded them -- perhaps science could. Leading a first-class team of research scientists on a disturbing odyssey into the unknown, Colm Kelleher spent hundreds of days and nights on the Skinwalker property and experienced firsthand many of its haunting mysteries. With investigative reporter George Knapp -- the only journalist allowed to witness and document the team's work -- Kelleher chronicles in superb detail the spectacular happenings the team observed personally, and the theories of modern physics behind the phenomena. Far from the coldly detached findings one might expect, their conclusions are utterly hair-raising in their implications. Opening a door to the unseen world around us, Hunt for the Skinwalker is a clarion call to expand our vision far beyond what we know.

Paul Hill was a well-respected NASA scientist when, in the early 1950s, he had a UFO sighting. Soon after, he built the first flying platform and was able to duplicate the UFO's tilt-to-control maneuvers. Official policy, however, prevented him from proclaiming his findings. "I was destined," says Hill, "to be as unidentified as the flying objects." For the next twenty-five years, Hill acted as an unofficial clearinghouse at NASA, collecting and analyzing sightings' reports for physical properties, propulsion possibilities, dynamics, etc. To refute claims that UFOs defy the laws of physics, he had to make "technological sense of the unconventional object." After his retirement from NASA, Hill finally completed his remarkable analysis. This book, published posthumously, presents his findings that UFOs "obey, not defy, the laws of physics." Vindicating his own sighting and thousands of others, he proves that UFO technology is not only explainable, but attainable.

"The stirring story of the achievements of the Victor, told by those who flew it and fixed it . . . well illustrated with spectacular photographs. □ Oxford Mail The Handley Page Victor was the third of the three V Bombers and the most long lasting, serving in the RAF until 1993, and still doing invaluable service in the first Iraq War. Moreover, in 1982 it was only the Victor tanker fleet based on Ascension Island that made possible the Vulcan Black Buck bombing of Port Stanley airfield and the long-range reconnaissance of Argentina by Nimrods. Victor Boys tells the story of all the great things that were achieved, recounted first hand by the operators themselves, aircrew and ground crew. Starting with accounts by test pilot Johnny Allam, who undertook the major development of the aircraft, through its work as a nuclear bomber during the Cold War, testing Blue Steel in Australia, to its superb work during the Falklands War and later as a first class air-to-air refueling tanker and vital support tool for fighters and other aircraft. Published to coincide with the Victor's 60th anniversary, the gripping text is superbly illustrated with photographs from the operators themselves, never released before. The stories are collated and set in context by Tony Blackman, ex chief test pilot of Avros who helped develop the Vulcan and initiated the development of the Victor K2 tanker. For him, initially,

the Victor seemed a competitor but he now readily admits what a wonderful aircraft the Victor became.

You Can't Tell the People

Featured on two major television documentaries! In December 1980, Larry Warren was a member of the Air Force security police stationed at RAF Bentwaters, a NATO base in Great Britain. On the night of the 28th he was on guard duty when he was taken by truck to join other Air Force personnel to investigate a disturbance in a Rendlesham Forest about five miles away, which turned out to be a landed UFO. This was the third night of UFO activity in the area and by far the most profound. When the men were debriefed the next day, they were warned to tell no one about what they had seen-as "bullets are cheap." And so began what would turn out to be the best documented and most significant military-UFO incident in history. This remarkable story, told with the help of investigative writer Peter Robbins, was the basis of two blockbuster television documentaries. "Warren's firsthand account explodes with authentic detail. A riveting, fascinating, and important book." -Whitley Strieber, author of Communion "[H]as the force of a well-told mystery novel, yet it is all disturbingly true. A major contribution to the literature." -Budd Hopkins, author of Missing Time "[O]ne gripping version of the story of this classic UFO case and its aftermath." -Publisher's Weekly "This book is dynamite. Last August, two men in rural Georgia announced that they had killed Bigfoot. The claim drew instant, feverish attention, leading to more than 1,000 news stories worldwide—despite the fact that nearly everyone knew it was a hoax. Though Bigfoot may not exist, there's no denying Bigfoot mania. With Bigfoot, Joshua Blu Buhs traces the wild and wooly story of America's favorite homegrown monster. He begins with nineteenth-century accounts of wildmen roaming the forests of America, treks to the Himalayas to reckon with the Abominable Snowman, then takes us to northern California in 1958, when reports of a hairy hominid loping through remote woodlands marked Bigfoot's emergence as a modern marvel. Buhs delves deeply into the trove of lore and misinformation that has sprung up around Bigfoot in the ensuing half century. We meet charlatans, pseudo-scientists, and dedicated hunters of the beast—and with Buhs as our guide, the focus is always less on evaluating their claims than on understanding why Bigfoot has inspired all this drama and devotion in the first place. What does our fascination with this monster say about our modern relationship to wilderness, individuality, class, consumerism, and the media? Writing with a scientist's skepticism but an enthusiast's deep engagement, Buhs invests the story of Bigfoot with the detail and power of a novel, offering the definitive take on this elusive beast.

The true nature of what actually crashed in Roswell, New Mexico, in 1947 remains classified. Only a select few have ever had access to the truth about what became known as Area 51. But what happened to the remnants of that crash is shrouded in even greater mystery. What began in the high desert of New Mexico ended at Wright-Patterson, an ultra-top-secret Air Force base in Dayton, Ohio. The physical evidence of extraterrestrial visitation was buried deep within this nuclear stronghold. How tragic that such seismic news should be kept from the people of the world . . . pieces of history, now quickly dwindling into oblivion as the last of the secret-keepers passes on. In addition to its rich history of military service to our nation, Wright-Patterson also stands as the secret tomb of one of the greatest occurrences in recorded history. Be prepared . . . the real Area 51--Wright-Patterson's vault--is about to be opened.

The UFO Experience

A collection of essays by noted naturalist John Burroughs in which he contemplates a wide array of topics including farming, religion, and conservation. A departure from previous John Burroughs anthologies, this volume celebrates the surprising range of his writing to include religion, philosophy, conservation, and farming. In doing so, it emphasizes the process of the literary naturalist, specifically the lively connection the author makes between perceiving nature and how perception permeates all aspects of life experiences

The Art of Seeing Things

This is the new must-have UFO book. For beginners and experienced researchers alike, historian Richard Dolan covers the full range of this incredibly complex topic in his uniquely engaging style. He offers fresh insights on everything connected to UFOs: ancient aliens, modern encounters, abductions, channelers, the politics and cover-up, the black budget world, the bizarre science, the social dimensions (read YouTube and Facebook), the future, and much more. Toward that end, Dolan gives practical insights on how to distinguish and investigate UFOs in today's world, where we are flooded with claims and videos and data of all types. In addition, as one of ufology's pioneers in the deep analysis of the cover-up, he offers an original perspective on how it all works and why the cover-up, despite being so entrenched and insidious, is nevertheless bound to end. He also writes on the nature of contact, speculating on who these "Others" might be. Finally, Dolan takes the reader through the "weird science" of UFOs, covering everything from propulsion to spacetime to consciousness and more. UFOs for the 21st Century Mind is a roadmap pointing the way forward in a field filled with uncertainty and obfuscation. In so doing, it is set to reposition an ancient phenomenon into a contemporary state of mind, reminding you just why the greatest mystery of our time is also one of the most important. Contents: Introduction 1. What Are UFOs? 2. Theories of Ancient Visitation 3. Into Modernity: Airships, Foo Fighters, and Flying Saucers, 1896 to 1969 4. UFO Secrecy and Those Who Fought It 5. What Do They Want? 11. Weird Science: Propulsion, Energy, Spacetime, and Consciousness 12. Into the Future, Into Ourselves Conclusion 486 p. Illustrated Endorsements: "In a field that can be so confusing, so complex, Richard Dolan has taken his many years of thinking about UFOs and written a completely fresh overview of the entire subject. . . . This is an ambitious work that truly ties the many different aspects of the

subject together. It's rare to find something like this, especially considering the care and thoroughness that went into it." -- George Noory, host of Coast to Coast AM. "As a follow-up to his previous books exploring the relationship between UFOs and the National Security State, historian Richard Dolan widens his perspective to explore all aspects of this provocative phenomenon. In this role, he takes us on a journey that brings to life the subtlety and depth of this rich subject, a truly captivating read." --H. E. Puthoff, Ph.D., Director, Institute for Advanced Studies at Austin "UFOs For the 21st Century Mind represents a new kind of book - one that clearly and intelligently addresses literally every aspect and implication of the most maligned, misunderstood and compelling subject in human history. Richard Dolan's newest work is perfect reading for serious students of ufology as well as the absolute beginner. Inspired, particularly well written, and the product of a first class mind for this or any other century." --Peter Robbins, coauthor of the U.K. bestseller, *Left At East Gate: A First-Hand Account of the Rendlesham Forest UFO Incident, Its Cover-up and Investigation* "This is an invaluable treatment of the known facets and seemingly endless implications regarding UFOs, with a much-appreciated focus on the human experience. A job well done, Richard." -- Sam Maranto, Investigative Researcher

The Last Book on the Left

" ""The threat or use of nuclear weapons would generally be contrary to the rules of international law applicable in armed conflict, and in particular the principles and rules of humanitarian law There exists an obligation to pursue in good faith and bring to a conclusion negotiations leading to nuclear disarmament in all its aspects under strict and effective international control."" - Advisory Opinion of the International Court of Justice, 8 July 1996 ""This book shows how courageous states from the developing world, working in concert with visionary lawyers, physicians and other sectors of international civil society, boldly obtained astonishing results from the highest court in the world. The World Court clearly ruled that the threat or use of nuclear weapons is illegal in almost all conceivable circumstances. The Court further underlined the unconditional obligation of the nuclear weapon states to begin and conclude negotiations on nuclear disarmament in all its aspects. It is now up to all of us to determine the follow-up, whatever the opposition. We cannot end this century without clear commitments and steps to eliminate nuclear weapons."" - Razali Ismail, Permanent Representative of Malaysia to the United Nations, President of the United Nations General Assembly, 1996-1997 ""It is not often that a judicial opinion on a given question is both hailed and criticized by participants on all sides of the question. This book, written by a leading member of the team that helped to prepare the case on the illegality of the threat and use of nuclear weapons, explains succinctly what the World Court, and the judges in their separate statements, did and did not say. In so doing, it makes a compelling case for the proposition that the Opinion represents a milestone on the road to nuclear abolition."" - Peter Weiss, Co-President, International Association of Lawyers Against Nuclear Arms The 20th century has been defined in large part by the unleashing of the terrible destructive power of the atom, and the subsequent struggle to overcome the threat of nuclear annihilation. If humankind survives, the 8 July 1996 Advisory Opinion of the International Court of Justice, and the extraordinary process that led up to it, will have

played an essential role. The (Il)legality of the Threat or Use of Nuclear Weapons is a concise yet thorough guide to the case. In straightforward language, it describes the history of this unprecedented initiative and summarizes and explains states' arguments to the Court, the Court's findings, and the separate statements of the judges. The author provides cogent expert analysis and, most importantly, reveals how the opinion imparts hope and points the way to the future: "" The Court has authoritatively interpreted law which states acknowledge they must follow, including humanitarian law protecting civilians from indiscriminate effects of warfare, the United Nations Charter, and the Nuclear Non-Proliferation Treaty. The implications are profound: abandonment of reliance on the threat and use of nuclear weapons as an instrument of national policy, and expeditious elimination of nuclear arsenals. The opinion can be cited as an authoritative statement of the law in any political or legal setting - including the United Nations and national courts and parliaments - in which nuclear weapon policies are challenged."" John Burroughs, an attorney for the Western States Legal Foundation in California, served as the legal coordinator for the World Court Project/International Association of Lawyers Against Nuclear Arms at the November 1995 hearings before the International Court of Justice.
