Shackleton's Way

The definitive collection of photographs from the Shackleton expedition includes never-before-published images from the remarkable 1914 expedition to Antarctica.

The Endurance

Drawing upon previously unavailable sources, Caroline Alexander gives us a riveting account of Shackleton's expedition one of history's greatest epics of survival. And she presents the astonishing work of Frank Hurley, the Australian photographer whose visual record of the adventure was never before published comprehensively. Together, text and image re-create the terrible beauty of Antarctica, the awful destruction of the ship, and the crew's heroic daily struggle to stay alive, a miracle achieved largely through Shackleton's inspiring leadership. The survival of Hurley's remarkable images is scarcely less miraculous: The original glass plate negatives, from which most of the book's illustrations are superbly reproduced, were stored in hermetically sealed canisters that survived months on the ice floes, a week in an open boat on the polar seas, and several more months buried in the snows of a rocky outcrop called Elephant Island. Finally, Hurley was forced to abandon his professional equipment; thereafter he captured some of the most unforgettable images of the struggle with a pocket camera and three rolls of Kodak film.

"Gripping and superb. This book will steal the night from you." —Laurence Gonzales, author of *Deep Survival* On January 17, 1913, alone and near starvation, Douglas Mawson, leader of the Australasian Antarctic Expedition, was hauling a sledge to get back to base camp. The dogs were gone. Now Mawson himself plunged through a snow bridge, dangling over an abyss by the sledge harness. A line of poetry gave him the will to haul himself back to the surface. Mawson was sometimes reduced to crawling, and one night he discovered that the soles of his feet had completely detached from the flesh beneath. On February 8, when he staggered back to base, his features unrecognizably skeletal, the first teammate to reach him blurted out, "Which one are you?" This thrilling and almost unbelievable

account establishes Mawson in his rightful place as one of the greatest polar explorers and expedition leaders. It is illustrated by a trove of Frank Hurley's famous Antarctic photographs, many never before published in the United States.

Shackleton's Journey Activity Book

The true adventures of David Fairchild, a late-nineteenth-century food explorer who traveled the globe and introduced diverse crops like avocados, mangoes, seedless grapes--and thousands more--to the American plate. In the nineteenth century, American meals were about subsistence, not enjoyment. But as a new century approached, appetites broadened, and David Fairchild, a young botanist with an insatiable lust to explore and experience the world, set out in search of foods that would enrich the American farmer and enchant the American eater. Kale from Croatia, mangoes from India, and hops from Bavaria. Peaches from China, avocados from Chile, and pomegranates from Malta. Fairchild's finds weren't just limited to food: From Egypt he sent back a variety of cotton that revolutionized an industry, and via Japan he introduced the cherry blossom tree, forever brightening America's capital. Along the way, he was arrested, caught diseases, and bargained with island tribes. But his culinary ambition came during a formative era, and through him, America transformed into the most diverse food system ever created.

The second book of Shaftal. The country has a ruler again, Karis, a woman who can heal the war-torn land and expel the invaders. But she lives in obscurity with her fractious found family. With war and disease spreading, Karis must act. And when Karis acts, the very stones of the earth sit up and take notice.

Little House on Rocky Ridge

A thought-provoking and penetrating account of the post-Cold war follies and delusions that culminated in the age of Donald Trump from the bestselling author of *The Limits of Power*. When the Cold War ended with the fall of the Berlin Wall, the Washington establishment felt it had prevailed in a world-historical struggle. Our side had won, a verdict that was both decisive and irreversible. For the world's "indispensable nation," its "sole superpower," the future looked very bright. History, having brought the United States to the very summit of power and prestige, had validated American-style liberal democratic capitalism as universally applicable. In the decades to come, Americans would put that claim to the test. They would embrace the promise of globalization as a source of unprecedented wealth while embarking on wide-ranging military campaigns to suppress disorder and enforce American values abroad, confident in the ability of U.S. forces to defeat any foe. Meanwhile, they placed all their bets on the White House to deliver on the promise of their Cold War triumph: unequaled prosperity, lasting peace, and absolute freedom. In *The Age of Illusions*, bestselling author Andrew Bacevich takes us from that moment of seemingly ultimate victory to the age of Trump, telling an epic tale of folly and delusion. Writing with his usual eloquence and vast knowledge, he explains how, within a quarter of a century, the United States ended up with gaping inequality, permanent war, moral confusion, and an increasingly

angry and alienated population, as well, of course, as the strangest president in American history.

Earth Logic

On November 12, 1912, a rescue team trekking across Antarctica's Great Ice Barrier finally found what they sought - the snow-covered tent of the British explorer Robert Falcon Scott. Inside, they made a grim discovery: Scott's frozen body lay between the bodies of two fellow explorers. They had died just eleven miles from the depot of supplies which might have saved them. Why did Scott's meticulously laid plans finally end in disaster, while his rival, Norwegian Roald Amundsen, returned safely home with his crew after attaining the Pole only days before the British team? In a newly revised and updated version of her original book, Diana Preston, returns to Antarctica and explores why Scott's carefully planned expedition failed, ending in tragedy.

DEL-Endurance

The harrowing tale of British explorer Ernest Shackleton's 1914 attempt to reach the South Pole, one of the greatest adventure stories of the modern age. In August 1914, polar explorer Ernest Shackleton boarded the Endurance and set sail for Antarctica, where he planned to cross the last uncharted continent on foot. In January 1915, after battling its way through a thousand miles of pack ice and only a day's sail short of its destination, the Endurance became locked in an island of ice. Thus began the legendary ordeal of Shackleton and his crew of twenty-seven men. When their ship was finally crushed between two ice floes, they attempted a near-impossible journey over 850 miles of the South Atlantic's heaviest seas to the closest outpost of civilization. In *Endurance*, the definitive account of Ernest Shackleton's fateful trip, Alfred Lansing brilliantly narrates the harrowing and miraculous voyage that has defined heroism for the modern age.

Skeletons on the Zahara

This is the classic account of Sir Ernest Shackleton's 1914-1916 Antarctic expedition. Written by the captain of the Endurance, the ship used by Shackleton on this ill-fated journey, it is a remarkable tale of courage and bravery in the face of extreme odds and a vivid portrait of one of the world's greatest explorers. "A breathtaking story of courage under the most appalling conditions." - Edmund Hillary

A First Rate Tragedy

A Pulitzer Prize-winning author examines South Pole expeditions, "wrapping the science in plenty of dangerous drama to keep readers engaged" (Booklist). *An Empire of Ice* presents a fascinating new take on Antarctic exploration—placing the famed voyages of Norwegian explorer Roald Amundsen, his British rivals Robert Scott and Ernest Shackleton, and others in a larger scientific, social, and geopolitical context. Recounting the Antarctic expeditions of the early twentieth century, the author reveals the British efforts for what they actually were: massive

scientific enterprises in which reaching the South Pole was but a spectacular sideshow. By focusing on the larger purpose of these legendary adventures, Edward J. Larson deepens our appreciation of the explorers' achievements, shares little-known stories, and shows what the Heroic Age of Antarctic discovery was really about. "Rather than recounting the story of the race to the pole chronologically, Larson concentrates on various scientific disciplines (like meteorology, glaciology and paleontology) and elucidates the advances made by the polar explorers . . . Covers a lot of ground—science, politics, history, adventure." —The New York Times Book Review

Rare Bird

At the turn of the twentieth century, Arctic explorer Edward Mackley sets out to reach the North Pole and vanishes into the icy landscape without a trace. He leaves behind a young wife, Emily, who awaits his return for decades, her dreams and devotion gradually freezing into rigid widowhood. A hundred years later, on a sweltering mid-summer's day, Edward's great-grand-niece Julia moves through the old family house, attempting to impose some order on the clutter of inherited belongings and memories from that ill-fated expedition, and taking care to ignore the deepening cracks within her own marriage. But as afternoon turns into evening, Julia makes a discovery that splinters her long-held image of Edward and Emily's romance. *The Still Point* moves through past, present, and future, with dreams revealing a universal simultaneity to the choices we must all make in the faces of love and passion. Long-listed for the Orange Prize, *The Still Point* is a powerful literary debut, masterfully told in the language of the heart.

Endurance

The astonishing saga of polar explorer Ernest Shackleton's survival for over a year on the ice-bound Antarctic seas, as "Time" magazine put it, "defined heroism". Alfred Lansing's scrupulously researched and brilliantly narrated book--with over 200,000 copies sold--has long been acknowledged as the definitive account of the "Endurance's" fateful trip.

Feats of Courage

Lead your business to survival and success by following the example of legendary explorer Ernest Shackleton Sir Ernest Shackleton has been called "the greatest leader that ever came on God's earth, bar none" for saving the lives of the twenty-seven men stranded with him in the Antarctic for almost two years. Because of his courageous actions, he remains to this day a model for great leadership and masterful crisis management. Now, through anecdotes, the diaries of the men in his crew, and Shackleton's own writing, Shackleton's leadership style and time-honored principles are translated for the modern business world. Written by two veteran business observers and illustrated with ship photographer Frank Hurley's masterpieces and other rarely seen photos, this practical book helps today's leaders follow Shackleton's triumphant example. "An important addition to any leader's library." -Seattle Times

The Story Study Guide

By the #1 New York Times bestselling author of *Killers of the Flower Moon*, a powerful true story of adventure and obsession in the Antarctic, lavishly illustrated with color photographs Henry Worsley was a devoted husband and father and a decorated British special forces officer who believed in honor and sacrifice. He was also a man obsessed. He spent his life idolizing Ernest Shackleton, the nineteenth-century polar explorer, who tried to become the first person to reach the South Pole, and later sought to cross Antarctica on foot. Shackleton never completed his journeys, but he repeatedly rescued his men from certain death, and emerged as one of the greatest leaders in history. Worsley felt an overpowering connection to those expeditions. He was related to one of Shackleton's men, Frank Worsley, and spent a fortune collecting artifacts from their epic treks across the continent. He modeled his military command on Shackleton's legendary skills and was determined to measure his own powers of endurance against them. He would succeed where Shackleton had failed, in the most brutal landscape in the world. In 2008, Worsley set out across Antarctica with two other descendants of Shackleton's crew, battling the freezing, desolate landscape, life-threatening physical exhaustion, and hidden crevasses. Yet when he returned home he felt compelled to go back. On November 13, 2015, at age 55, Worsley bid farewell to his family and embarked on his most perilous quest: to walk across Antarctica alone. David Grann tells Worsley's remarkable story with the intensity and power that have led him to be called "simply the best narrative nonfiction writer working today." Illustrated with more than fifty stunning photographs from Worsley's and Shackleton's journeys, *The White Darkness* is both a gorgeous keepsake volume and a spellbinding story of courage, love, and a man pushing himself to the extremes of human capacity.

The Storytelling Edge

The astonishing saga of polar explorer Ernest Shackleton's survival for over a year on the ice-bound Antarctic seas, as *Time* magazine put it, "defined heroism." Alfred Lansing's scrupulously researched and brilliantly narrated book -- with over 200,000 copies sold -- has long been acknowledged as the definitive account of the *Endurance's* fateful trip. To write their authoritative story, Lansing consulted with ten of the surviving members and gained access to diaries and personal accounts by eight others. The resulting book has all the immediacy of a first-hand account, expanded with maps and illustrations especially for this edition.

Shackleton's Boat Journey

NEW YORK TIMES BESTSELLER • The riveting inside story of three heroic astronauts who took on the challenge of mankind's historic first mission to the Moon, from the bestselling author of *Shadow Divers*. "Robert Kurson tells the tale of Apollo 8 with novelistic detail and immediacy."—Andy Weir, #1 New York Times bestselling author of *The Martian* and *Artemis* By August 1968, the American space program was in danger of failing in its two most important objectives: to land a man on the Moon by President Kennedy's end-of-decade deadline, and to triumph over the Soviets in space. With its back against the wall, NASA made an almost

unimaginable leap: It would scrap its usual methodical approach and risk everything on a sudden launch, sending the first men in history to the Moon—in just four months. And it would all happen at Christmas. In a year of historic violence and discord—the Tet Offensive, the assassinations of Martin Luther King, Jr., and Robert Kennedy, the riots at the Democratic National Convention in Chicago—the Apollo 8 mission would be the boldest, riskiest test of America’s greatness under pressure. In this gripping insider account, Robert Kurson puts the focus on the three astronauts and their families: the commander, Frank Borman, a conflicted man on his final mission; idealistic Jim Lovell, who’d dreamed since boyhood of riding a rocket to the Moon; and Bill Anders, a young nuclear engineer and hotshot fighter pilot making his first space flight. Drawn from hundreds of hours of one-on-one interviews with the astronauts, their loved ones, NASA personnel, and myriad experts, and filled with vivid and unforgettable detail, *Rocket Men* is the definitive account of one of America’s finest hours. In this real-life thriller, Kurson reveals the epic dangers involved, and the singular bravery it took, for mankind to leave Earth for the first time—and arrive at a new world. “*Rocket Men* is a riveting introduction to the [Apollo 8] flight. . . . Kurson details the mission in crisp, suspenseful scenes. . . . [A] gripping book.”—The New York Times Book Review

Rocket Men

Manhood in the Making

Ernest Shackleton is one of history’s great explorers, an extraordinary character who pioneered the path to the South Pole over 100 years ago and became a dominant figure in Antarctic discovery. A charismatic personality, his incredible adventures on four expeditions have captivated generations and inspired a dynamic, modern following in business leadership. None more so than the *Endurance* mission, where Shackleton’s commanding presence saved the lives of his crew when their ship was crushed by ice and they were turned out on to the savage frozen landscape. But Shackleton was a flawed character whose chaotic private life, marked by romantic affairs, unfulfilled ambitions, overwhelming debts and failed business ventures, contrasted with his celebrity status as a leading explorer. Drawing on extensive research of original diaries and personal correspondence, Michael Smith's definitive biography brings a fresh perspective to our understanding of this complex man and the heroic age of polar exploration.

The Story group Bible study provides groups of all sizes the opportunity to discuss and apply what they experience during the 31-week The Story church campaign. To understand the Bible, says Frazee, you need bifocal lenses, because two

perspectives are involved. The Lower Story, our story, is actually many stories of men and women interacting with God in the daily course of life. The Upper Story is God's story, the tale of his great, overarching purpose that puts the individual stories together like panels in one unified mural. In 31 sessions, The Story video-based group study opens your eyes to God's master plan unfolding in the lives of the Bible's characters and in your own life. Discover the heart of God's Upper Story, and the joy that comes as you align your story with God's. The Story Study Guide and DVD (sold separately) are designed for use by groups of all sizes, including small groups and Sunday school and adult education classes. The Food Explorer

The dramatic, fictionalized account of Robert Falcon Scott's famed and fatal expedition to Antarctica by one of Britain's best-loved authors. Departing from Cardiff in 1910, the Terra Nova entered dark waters and headed south. On board were Petty Officer Edgar "Taff" Evans, Dr. Edward "Uncle Bill" Wilson, Capt. Robert Falcon "Con" Scott, Lt. Henry Robertson "Birdie" Bowers, and Capt. Lawrence Edward "Titus" Oates. Through an imaginative yet historically accurate retelling of the crew's mission to become the first explorers to reach the South Pole—and with each of the book's five chapters narrated from the unique perspective of one of these men—author Beryl Bainbridge imbues a tragic and thrilling adventure story with profound psychological, metaphysical, and emotional insight. The first three chapters of *The Birthday Boys*—recounted by Evans, Wilson, and Scott, respectively—tell of the preparations and fundraising required for the journey, two stopovers in Madeira and South Trinidad Island, and the difficult conditions the expedition faces when they land on Antarctica. It is Wilson who first fears for the safety of the crew, when from atop the ship's crow's-nest he spies a fantastical half-man-half-bird creature flying above the sea. The doctor is certain this apparition is a harbinger of death. Troubles then ensue when Scott sets up a base camp at Cape Evans as well as several depots in the direction of the South Pole. The motor sledge breaks down almost immediately, several ponies are lost to the harsh elements, and it is revealed that a competing polar expedition led by Norwegian explorer Roald Amundsen is already well ahead of Scott's team. In the final two chapters—told by Bowers and Oates—readers are taken on a dangerous but

spectacular detour to a penguin rookery, where the men witness gorgeous auroras, build an igloo, gather eggs, and slaughter the arctic birds for their blubber. When a violent blizzard hits, it looks as if no one will make it out alive. But brotherly love in the face of all odds gives the men the power to survive, and the five heroes set off on their final march to the South Pole. Though history has already revealed the catastrophic end of this tale, Bainbridge shows us the bravery, courage, and humanity essential to the adventure. Masterfully blurring the boundaries between fact and fiction, *The Birthday Boys* is a compelling historical biography that challenges readers to discover truths that can only be reached through the imagination. This ebook features an illustrated biography of Beryl Bainbridge including rare images from the author's estate.

NATIONAL BEST SELLER A stunning, personal memoir from the astronaut and modern-day hero who spent a record-breaking year aboard the International Space Station—a message of hope for the future that will inspire for generations to come. The veteran of four spaceflights and the American record holder for consecutive days spent in space, Scott Kelly has experienced things very few have. Now, he takes us inside a sphere utterly hostile to human life. He describes navigating the extreme challenge of long-term spaceflight, both life-threatening and mundane: the devastating effects on the body; the isolation from everyone he loves and the comforts of Earth; the catastrophic risks of colliding with space junk; and the still more haunting threat of being unable to help should tragedy strike at home--an agonizing situation Kelly faced when, on a previous mission, his twin brother's wife,

American Congressman Gabrielle Giffords, was shot while he still had two months in space. Kelly's humanity, compassion, humor, and determination resonate throughout, as he recalls his rough-and-tumble New Jersey childhood and the youthful inspiration that sparked his astounding career, and as he makes clear his belief that Mars will be the next, ultimately challenging, step in spaceflight. In *Endurance*, we see the triumph of the human imagination, the strength of the human will, and the infinite wonder of the galaxy.

The White Darkness

In the tradition of Malcolm Gladwell, Gardner explores a new way of thinking about the decisions we make. We are the safest and healthiest human beings who ever lived, and yet irrational fear is growing, with deadly consequences — such as the 1,595 Americans killed when they made the mistake of switching from planes to cars after September 11. In part, this irrationality is caused by those — politicians, activists, and the media — who promote fear for their own gain. Culture also matters. But a more fundamental cause is human psychology. Working with risk science pioneer Paul Slovic, author Dan Gardner sets out to explain in a compulsively readable fashion just what that statement above means as to how we make decisions and run our lives. We learn that the brain has not one but two systems to analyze risk. One is primitive, unconscious, and intuitive. The other is conscious and rational. The two systems often agree, but occasionally they come to very different conclusions. When that happens, we can find ourselves worrying about what the statistics tell us is a trivial threat — terrorism, child abduction, cancer caused by chemical pollution — or shrugging off serious risks like obesity and smoking. Gladwell told us about “the black box” of our brains; Gardner takes us inside, helping us to understand how to deconstruct the information we’re bombarded with and respond more logically and adaptively to our world. Risk is cutting-edge reading.

b.A masterpiece of historical adventure, *ISkeletons on the Zahara* The western Sahara is a baking hot and desolate place, home only to nomads and their camels, and to locusts, snails and thorny scrub -- and its barren and ever-changing coastline has baffled sailors for centuries. In August 1815, the US brig *Commerce* was dashed against Cape Bojador and lost, although through bravery and quick thinking the ship's captain, James Riley, managed to lead all of his crew to safety. What followed was an extraordinary and desperate battle for survival in the face of human hostility, starvation, dehydration, death and despair. Captured, robbed and enslaved, the sailors were dragged and driven through the desert by their new owners, who neither spoke their language nor cared for their plight. Reduced to drinking urine, flayed by the sun, crippled by walking miles across burning stones and sand and losing over half of their body weights, the sailors struggled to hold onto both their humanity and their sanity. To reach safety, they would have to overcome not only the desert but also the greed and anger of those who would

keep them in captivity. From the cold waters of the Atlantic to the searing Saharan sands, from the heart of the desert to the heart of man, Skeletons on the Zahara is a spectacular odyssey through the extremes and a gripping account of courage, brotherhood, and survival.

The Still Point

"Every man is born with just one thing: his sovereignty--his power to respond to his environment and his circumstances. Unfortunately, most men have spent much of their lives giving away that sovereignty. Every time a man passes blame or shirks his responsibility, every time he makes excuses for his performance, and every time he trades his unlimited potential for a little perceived safety and security, he willingly submits himself to the mercy of others. Is it any wonder that men, in general, seem to have lost their way? You don't have to look very far to recognize that men don't seem to possess the same amount of vigor and purpose they once did. It's a call for men to become fully the men they are meant to be so they may more adequately take care of themselves and those they are responsible for. Men have always been expected to protect, provide, and preside over themselves, their families, their businesses, and their communities. By embodying the thirteen Sovereign Virtues we detail inside, every man will be more capable of fulfilling his masculine duties and responsibilities"--
