My Big Fat Zombie Goldfish: Jurassic Carp: Book 6

What makes us human, and where did we come from? How did a clever ape climb down from the trees and change the world like no other animal has done before? This large-format, highly illustrated book guides readers through the key aspects of the human story, from the anatomical changes that allowed us to walk upright and increased brain size in our ancestors, to the social, cultural, and economic developments of our more recent cousins and our own species. Along the way, focus spreads take a closer look at some of the key species in our history, from the ancient Australopithecus Afarensis, 'Lucy', to our recent cousins the Neanderthals and ourselves, Homo sapiens. Looking beyond the anatomical evolution of humans, this book explores how our culture and way of living has evolved, from how trails of cowry shells reveal early trade between tribes, to how and why humans first domesticated dogs, horses, and farm animals, and began settling in permanent villages and cities. Through digestible information and absorbing illustration, young readers will be given an insight into their own origins, and what it really means to be a human.

But then French-Canadian transfer student Julia Romero entered the race...and put the moves on Stacey ' s best friend/campaign adviser, Brian. Stacey also didn ' t count on Tony Guo, resident stoner, whose sole focus is on removing the school ' s ban of his favorite chocolate milk, becoming the voice of the little guy, thanks to a freshman political " mastermind " with a blue Mohawk. Three candidates, three platforms, and a whirlwind of social media, gaffes, high school drama, and protests make for a ridiculously hilarious political circus that just may hold some poignant truth somewhere in the mix.
