The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, *How Europe Underdeveloped Africa*, Rodney

The authors explore its different aspects through the various political structures of the age - empires, monarchies, city-republics - and how they functioned and related to one another. A strength of the book remains the space it devotes to the growing importance of town-life in the sixteenth century, and to the economic background of political change.

continuing relevance and appeal. This introduction to medieval literature provides some of the cultural context that readers need to know in order to understand the literature, such as the religious orientation of the people, often deep and sincere but sometimes treated casually or subjected to intense scrutiny. The first chapter provides a brief explanation of medieval religious thought, cosmology and intellectual history. The remaining chapters provide introductions to a number of individual works ranging from Beowulf to the works of Chaucer. Avoiding the tendency to regard the Middle Ages as an era dominated by Christian men, these discussions include works by women writers and Jewish writers and a chapter on the medieval Japanese masterpiece The Tale of Genji.
