Hearings, Reports and Prints of the Senate Committee on Appropriations

Read Free Vaccination Against Smallpox Great Minds

Labor-Health, Education, and Welfare Appropriations for Fiscal Year 1967

The Vaccination Inquirer and Health Review

Guides readers in understanding why they should vaccinate, emphasizing the importance of herd immunity and explaining how the anti-vaccine movement misleads the public on this important issue.

American Homoeopathist

The Three Original Publications on Vaccination Against Smallpox

Vaccination Against Smallpox

A Concise History of Small-pox and Vaccination in Europe

Harper's Weekly

Vaccine

Journal

The War Against Smallpox

The established reference work *Guide to Reprints* has been radically reworked for this edition. Bibliographical data was substantially increased where information was obtainable. In addition, the user-friendliness of *Guide to Reprints* was raised to the high level of other K.G. Saur directories through author-title cross-references, a subject volume, a person index and a publisher index. In this edition, the directory lists more than 60,000 titles from more than 350 publishers.

How to Think Yourself to Happiness

This enlarged 1933 edition of a 1931 biography reflected and furthered the growing worldwide recognition of the 'father of immunology'.

Anti-Vaxxers

A renowned researcher vigorously challenges the anti-vaccine movement in this powerful defense of science in the face of fear.

The Vaccination Controversy

Explores the history of vaccine development and the rise of antivaccination societies in late-nineteenth-century America.

The Political History of Poland

The Medical Bulletin

Read Free Vaccination Against Smallpox Great Minds

The once-dreaded scourge of smallpox has been eradicated through barrier immunization. The eminent scientist Edward Jenner (1749-1823) was a pioneer in demonstrating that vaccination was an effective means of preventing smallpox. In the three groundbreaking treatises contained in this volume, originally published between 1798 and 1800, Jenner summarizes his evidence in favor of vaccination and describes individual cases.

The Old Dominion Journal of Medicine and Surgery

A history of the global spread of vaccination during the Napoleonic Wars, when millions of children were saved from smallpox.

Guide to Reprints

"A presentation of the scientific argument in favor of vaccination, which probes the consequences, origins and impact of the the anti-vaccination movement"--

Old Dominion Journal of Medicine and Surgery

Your Baby's Best Shot

Proceedings of the Philadelphia County Medical Society.

The International Military Digest Annual

Journal of the American Medical Association

The once-dreaded scourge of smallpox has been eradicated through barrier immunization. The eminent scientist Edward Jenner (1749-1823) was a pioneer in demonstrating that vaccination was an effective means of preventing smallpox. In the three groundbreaking treatises contained in this volume, originally published between 1798 and 1800, Jenner summarizes his evidence in favor of vaccination and describes individual cases.

Deadly Choices

The Antivaccine Heresy

History and Pathology of Vaccination

International Military Digest

International Record of Medicine and General Practice Clinics

Stanley Williamson's meticulously researched history of the British government's smallpox vaccination program begins with Edward Jenner's development of the vaccine at the end of the eighteenth century, charts the astonishing speed at which it became compulsory for children, and documents the decades of resistance that resulted in its repeal in 1946. Along the way Williamson examines the social, political, and ethical motivations of both factions. The power to make medical choices, including those regarding vaccination, remains a hotly contested issue today, making *The Vaccination Controversy* a timely contribution to our knowledge of medical history.

Good Words

Why does the United States Center for Disease Control recommend that babies receive 45 injections of toxic substances known as "vaccinations" by the time they are 6 months old? When did the police powers of the state start dictating personal health care choices and foist upon men, women and children of all ages compulsory medical procedures such as vaccinations? According to James, *The Vaccine Religion* is a 21st century Mass Mind Virus marketed by a multi-billion dollar hospital, drug, and insurance racket and reinforced by the World Health Organization, the United States Government and mainstream media. James argues that no

Western Medical Times

Federal Foreign Research Spending and the Dollar Drain

A definitive history of vaccination ranges from Edward Jenner's 1796 creation of the world's first smallpox inoculation to the present day, looking at both the benefits of vaccination as well as the current controversy over their potential neurological side effects and the pharmaceutical companies' emphasis on treatment rather than prevention.
